

Prospective New Carbon Business Issuer

NSX has received a Suitability Submission from MyCarbon Limited and provided initial in-principle advice on its submission in order to proceed to the next stage.

MyCarbon proposes to list its ordinary shares on NSX by mid-2024 and expects to also quote carbon backed securities thereafter.

NSX will set up a separate Carbon Board for MyCarbon's quoted products.

NSX is supportive of initiatives to decarbonise the Australian economy and to make investing in these products accessible to all investors.

Upon receipt, the formal listing application will follow the normal NSX admission process.
