

Vet Biotechnology Ltd (ACN 105 577 017)

NSX COMPANY ANNOUNCEMENT

NSX codes VBL, VBLO

August 16 2005 at 17:30 EST.

Orders for Equine Stem Cell Service to Treat Tendon and Ligament Injury.

Vet Biotechnology Ltd announced that it has received six orders for the bone marrow derived equine stem cell services, for repair of injured tendons and ligaments, since the launch of the service in Australia on July 1 2005.

Of the stem cell orders received, three have been successfully implanted into injured horses and the remaining orders are currently being processed in the laboratory at the Institute of Medical and Veterinary science.

Orders for the service have been received from veterinarians based in New South Wales, Victoria and South Australia who were trained in the use of the services in April this year.

The bone marrow derived stem cell services are unaffected by the recent announcement regarding the delay of the launch of the umbilical cord stem cell storage service in Australia.
