## **HIGHLIGHTS**

- Over NZ \$1.1M raised in placement and rights issue
- Drilling to commence Q1 2007
- Spin-off of Mid-Earth Minerals planned Q1 2007

#### **NOTES TO THE FINANCIAL STATEMENTS**

#### Reconciliation of Operating Cashflow and Consolidated Net Profit after Taxation

	30/09/06	30/09/05	31/03/06
Net surplus/(deficit) after taxation and			
before share of associate	(529,372)	(90,541)	(2,621,401)
Add non-cash items:			
Depreciation	2,127	2,426	4,916
Capitalised field expenditure written off	199,973		2,369,786
Exchange gain	(2)	-	(15)
	202,098	2,426	2,374,687
Add (less) movement in working capital:			
Decrease/(increase) in debtors	(6,371)	5,100	(765)
Increase/(decrease) in creditors	142,925	31,610	3,434
Decrease/(increase) in accrued income	960	1,385	-
Decrease/(increase) in GST	(2,848)	59,664	13,254
	134,666	97,759	15,923
Net cash inflows (outflows) from operating activities	(192,608)	9,644	(230,791)

These interim financial statements have been prepared in accordance with Financial Reporting Standard 24, Interim Financial Statements, and should be read in conjunction with the annual financial statements for the year ended 31 March 2006.

The consolidated half year accounts have been audited and the audit report is not qualified. A copy of the audit report can be read or obtained from the registered office of the Company.

The policies adopted by the Company for its annual financial statements have been consistently applied in the preparation of these interim financial statements.

#### Adoption of International Financial Reporting Standards

The directors have commenced planning for the conversion to International Financial Reporting Standards and have made the decision to adopt NZ IFRS for the financial year ended 31 March 2008.

Accounting policies are not expected to vary significantly from those currently applied in the preparation of the financial statements. Had the financial report been prepared using IFRS, the impact on the financial report would not have been material. At the time of adopting NZIFRS the actual impact of adoption may vary.

#### **Events Subsequent to Balance Date**

#### Renounceable Rights Issue

Heritage Gold issued a Prospectus on 25 October 2006 offering a pro-rata issue to existing shareholders on the basis of one new ordinary share for every four shares held - to a maximum of 37,062,433 new shares. The offer was underwritten to 18,531,216 shares and closed on 22 November 2006.

#### Mid-Earth Minerals Limited

During the period, Heritage Gold commenced the spin off of its Waihi district gold properties into a special purpose subsidiary, Mid-Earth Minerals Limited (Mid-Earth). Heritage currently holds 100% of the voting shares in Mid-Earth. The transfer of Heritage's Waihi district gold assets to Mid-Earth and distribution of Mid-Earth shares to Heritage shareholders has many steps. Whilst the Directors are proceeding with these steps this proposal may be subject to change in whole or in part.

CONSOLIDATED STATEMENT OF FINANCIAL PERFORMANCE For the six months ended 30 September 2006

#### **DIRECTORS' REPORT**

The Directors are pleased to present the half year report for Heritage Gold for the six months ended 30 September 2006. Heritage has had a successful half year and on behalf of the Directors I would like to thank shareholders for their continued support of the Company. Heritage is continuing with its plan to acquire further strategic projects. The Company is currently reviewing its proposal to spin-off Mid-Earth Minerals (MEM) in order to maximise potential benefits for Heritage shareholders. The proposal involves the transfer to MEM of the exploration permits held by Heritage in the Waihi district. Allowing MEM, under the direction of a separate Board of Directors, to focus on evaluation and future development of the gold projects.

# GOLD PROJECTS (New Zealand)

#### Karangahake (100%)

The Karangahake gold mining centre is an historic 1 million oz gold producer with a 3:1 silver/gold ratio recorded in previous production.

Further drilling at Karangahake in the first quarter of 2007 is planned to test areas that have already been identified as favourable for mineralisation.

The objective is to expand the existing resource base at Karangahake, where the target is a resource sufficient to support a stand-alone treatment plant, estimated at 500,000 to 600,000 oz of gold.

Environmental studies continued during the period. We continue to support research at the Geology Department at the University of Auckland that focuses on identifying mineralogical, geochemical, and geophysical factors that identify areas of gold mineralisation.

Joint venture discussions with overseas companies were held during the second quarter. These discussions were entered into on the basis that any outcome would be advantageous for the proposed spin-off of Mid-Farth Minerals

#### Other Gold Areas (100%)

Exploration work at the Waihi North and Golden Valley projects included geological mapping and geochemical surveys designed to add new information to the search for potentially mineralised areas at relatively shallow depths. Both projects are within 10 kilometres of Newmont's Waihi treatment plant.

The Waihi North project extends from the Martha open pit mine, 10 kilometres north to the former Golden Cross mine and covers the northern part of the Waihi hydrothermal alteration system that hosts the giant Martha gold deposit (production 7.4 million oz gold and nearly 51 million oz silver) and the Favona underground gold deposit.

Golden Valley covers 50 square kilometres and lies along the eastern boundary of Newmont's mining tenements at Waihi. Initial results are encouraging and further surveying is scheduled, along with drilling.

# Northland Gold & Base Metals Project (100%)

A subsidiary of Heritage, Northland Minerals Limited (NML), has applied for two prospecting permits in Northland where the Company has identified potential epithermal gold-silver and porphyry copper deposits, as well as gold-rich volcanogenic massive sulphide base metal deposits.

The Hikurangi area is prospective for epithermal gold-silver deposits, similar to those found in the Coromandel volcanic zone which hosts the Martha gold deposit. Hikurangi is also prospective for porphyry copper deposits.

The Tangihua area has potential for gold-rich volcanogenic massive sulphide base metal deposits and previous explorers have noted surface indications are favourable for this type of mineralisation.

Although the region shows encouraging geology and significant exploration potential, it has attracted very little attention over the past 30 years.

Heritage is planning a comprehensive prospecting programme that will include airborne geophysics, regional mapping, geochemical surveying and deposit modelling to select areas of mineralisation for detailed evaluation.

Cash at end of period

#### **DIRECTORS' REPORT**

## **BROKEN HILL COBALT LIMITED (New** South Wales) (33%)

Broken Hill Cobalt (BHC) has an exploration licence and two mining leases over cobalt mineralisation outlined at Thackaringa near Broken Hill.

BHC has reviewed previous metallurgical testwork including options for processing of the mineralisation. Drilling is planned to test extensions of the mineralised zones, increase the potential resources, and identify possible high grade sections.

The cobalt-bearing zones have so far been tested to only 100 metres below surface, and are open at depth and along strike.

#### **FUNDING**

On 29 September 2006 the Company placed 16,667,000 shares to sophisticated Australian investors at a price of AU 2.5 cents per share to raise AU \$416.675. No related party or director of Heritage participated in the placement.

On 9 October 2006 Heritage announced a 1 for 4 pro rata renounceable rights issue of 37,062,433 ordinary shares to shareholders at an issue price of AU 2.5 cents or NZ 2.9 cents per ordinary share. A combined Investment Statement, Short Form Prospectus and Transaction Specific Prospectus for the rights issue was sent to all shareholders and warrant holders after the document was registered in New Zealand and lodged with the Australian Securities and Investments Commission under Section 713 of the Australian Corporations Act 2001.

The offer closed on 22 November 2006 and 24,420,201 ordinary shares were issued to existing shareholders, with a further 5,248,436 ordinary shares allocated to shareholders and warrant holders who had applied for the shortfall in the issue. To date the number of shares allocated is approximately 80% of the total available in the rights issue.

The total amount raised by the placement and rights issue exceeds NZ \$1.1M (excluding expenses).

The Board has discretion to place the remaining 7,393,796 ordinary shares with sophisticated or professional investors, no later than 21 December 2006

#### **ANNUAL MEETING**

At the Company's Annual Meeting on 29 September 2006 all resolutions were passed with the requisite majorities.

#### **NEW DIRECTOR**

On 10 October 2006 the Company appointed Matthew Geoffrey Hill to the Board. Matthew has an extensive background in the Australian and international equities markets and specialises in corporate financial advice, mergers, acquisitions and restructuring.

#### OUTLOOK

Heritage is seeking further strategic projects to enhance its long term asset flow and broaden its exposure to base metals.

Peter Atkinson Managing Director 24 November 2006
