20 April 2011

GENERAL ANNOUNCEMENT

MOUNT ROMMEL ANNOUNCES ISSUE OF WORK AUTHORITY FOR GLENFINE MIN 5492.

On 6 April 2011 the Directors of Mount Rommel Mining Limited disclosed to the market generally, and to its shareholders, the statutory Work Plan procedures completed for Glenfine, together with those consequent requirements of the Department of Primary Industries, Victoria. All readers of this Announcement today will find, by review of that 6 April 2011 market release, a list of those matters then required to be formally completed to the satisfaction of the Department. Duly completed, the Work Authority application was made on 13 April, 2011.

Information received by Directors 19 April, 2011, states that a Work Authority for the Glenfine Project has been formally granted.

This completion of formal Departmental requirements occurred within 14 days. Directors consider this to be a short period of time, given those consequent requirements included preparations for an environmental bond, which in turn required completion of contract documents between the Company and its nominated bank, and between that bank and the Minister for Resources.

The Company places no shares for its current financial needs, such as bonds and the like. The funding arrangements preferred by Members of the Company anticipates a flow of gold from the Glenfine Project - see the web-site of the Company.

The issue of this Work Authority is clear evidence of the collective success achieved by those Members of the Company currently acting in concert with Directors to bring about the first gold production for many years in the Shire of Golden Plains.

The issue of this Work Authority clears away any uncertainty as to the ability of this Company to progress its gold property development activities in the Central Goldfields of the State of Victoria. Action in the field at Glenfine continues planned to commence about 9 May, 2011.

Fred Hunt
Chairman
