Letter^{from} the Chairman

Right now we see a wonderful opportunity to participate in the growth of one of Australia's largest regional centres, subject to a Development Application being granted.

Peter Spann,
Chairman

Dear Shareholder,

I am pleased to offer you the opportunity to invest in Vertua Limited ("the Company"). Set out in this Prospectus are details of an Offer of New Shares

The purpose of the Offer outlined in this Prospectus is to provide the Company with funds for ongoing working capital to evaluate and invest in new projects and fund existing projects as required.

About Vertua Limited:

Vertua Limited is a property investment company with a single investment in a development site in Toowoomba, Queensland. The mandate of the company is to acquire property with development potential and over time to realize that potential. The Company listed on the National Stock Exchange of Australia on 28 February 2007. As disclosed in the financial report for the period ended 30 June 2011, the Company has been engaged in a number of property investments. The Company is currently managed by Mr Benjamin Doyle and a Board of highly skilled Directors.

Following 30 June 2010, the Company was able to complete a compulsory acquisition of Property Fox No.1 Limited. Accordingly, Property Fox No.1 Limited is now a wholly owned subsidiary of the Company. This has consolidated the ownership of the entire Toowoomba properties in the Company and its subsidiary. The compulsory acquisition was completed on 29 June 2010 together with the purchase by the Company of 1,250,000 Ordinary Shares held by Fox Portfolio Pty Limited (a company controlled by Mr Peter Spann) for \$1000.00.

The combined consolidated assets of the group as at 30 June 2011 were \$2,346,597.

The Investment Strategy of Vertua Limited:

The investment strategy of the Company is to endeavor to invest across a broad range of property related investments. It is intended that the Company will gain exposure to a range of projects, providing the benefits of geographical diversification, while maintaining strong risk-adjusted investor returns.

The Company may undertake the following types of investments:

- Investing in equity or mezzanine/loan debt capital (either directly or indirectly through other entities) in quality property developments being undertaken by proven property developers, offering the potential for appropriate risk adjusted returns;
- Acquiring or investing directly or indirectly in income producing properties with an opportunity to create value for investors through active asset management (such as re-leasing, refurbishment and repositioning) with the aim of delivering enhanced income returns; and
- Investing in assets from which the Company will seek to make short-term development profits.

A Summary of the Current and Proposed Projects of Vertua Limited:

In the last year, Mr Benjamin Doyle has been actively seeking new projects that will provide returns to investors, as well as managing the existing properties (and potential new developments) held by the Company.

Provided below is an update on a few of the Company's current and proposed projects:

1. Toowoomba, Queensland

It is the vision of the Company to build a landmark development in the Garden City of Toowoomba. The current development proposal is that the site will consist of restaurants, retail outlets, cafés and commercial premises as well as a large residential component with landscaped gardens and outdoor eatery areas. It was the original vision of Mr Peter Spann, the company and Property Fox No.1 Limited to purchase a parcel of land in one of the strong epicenters in Queensland that could be held as a positive cash flow asset with a long term view to develop into a development site.

The Company is very pleased with the progress it has made on the Toowoomba development project. After many months working with the architects, town planners and local agents, the Company's architects met with the local council to discuss its development proposal. Some exceptional news about the site and allowable density and the Toowoomba Council requirements came from this meeting. Accordingly, the plans went back to the architects to further develop, with an increase to the site by adding units and commercial premises that could potentially lead to higher returns. The Company has also been able to negotiate and secure an option over a parcel of land which has now increased the development site by a further 749m².

A Development Application was lodged with council on the 18th May 2011 and we anticipate approval early 2012, the Board is also very positive that the development will exceed the original estimations for development returns.

2. Existing Residential Apartment Buildings, New South Wales

An excellent opportunity exists for the Company to extend its activities into the development of apartment buildings and benefit from the vast experience of Mr Benjamin Doyle in this area. During the last nine years Mr Doyle has purchased, renovated and sold or project managed over 46 residential apartment buildings totaling over 350 apartments. For a brief overview of the track record of Mr Doyle, you can view his website at www.fiducia.com.au. The Company is planning to purchase and renovate and/or enter into joint venture agreements to buy and renovate small to medium sized residential apartment building projects. It is planned that any such building project will be located in the eastern suburbs and/or the inner north shore of Sydney up to and including a radius of approximately 10 kilometres from Sydney's CBD. This is a very good opportunity for the Company to diversify into projects with a faster turnover and good potential cash flow.

For more information on the activities of the Company please see the announcements of the Company outlined at Section 8.4.3 of this Prospectus.

This Prospectus outlines the details of the Offer. I urge you to read this Prospectus carefully for further details of this opportunity. If you have any questions regarding the Offer, you should consult a person able to give you financial product advice, an accountant, stockbroker, solicitor or other professional advisor

The Board commends this opportunity to you to take part in this Offer.

Yours faithfully,

VERTUA LIMITED

Peter Spann
CHAIRMAN

SECTION 3

Investment Summary

This Investment Summary is not intended to provide full information on the New Shares offered by this Prospectus. To form an appropriate investment opinion, the Prospectus should be read in full.

Since his appointment as Managing Director of Vertua, Ben Doyle has been actively seeking opportunities to provide value to investors and maximise the potential of the Company's existing assets.

In 2005, Vertua Limited, under the name Property Fox No.2 Limited purchased a large parcel of land in Toowoomba (Australia's largest inland regional city) with a view to holding the property until its development potential could be maximised.

The block is located on Ruthven street, one of two main roads into the CBD and is just 1.8km from the GPO. Currently it is comprised of seven house blocks with older homes and two blocks of flats. An extra house is also under option.

The proximity to town and the highly visible location make the property an excellent prospect for potential development to commercial and high density residential, subject to Development Application approval.

For numerous reasons explored in more detail later in this section, the Board now believes the time has come to realize the potential of this property and many months of research and close liaison with Architects, town planners and local agents have resulted in an exciting development proposal for this parcel of land. Please note that at the time of lodgement of this Prospectus no Development Application has been approved.

Our research would indicate that there are enough favorable underlying fundamentals to aggressively pursue this development opportunity. Some of these include:

- Current and future prospects for the area and the growth this is expected to bring;
- Strong alignment with Council plans and objectives for the development of the city;
- Livability factors and affordability;
- Real Estate trends in the area; and
- Positive economic indicators.

The Company has exciting prospects, especially for the Toowoomba project.

C. TRENDS IN THE PROPERTY INDUSTRY

During the last decade, Australia has witnessed a substantial growth in its property sector, with demand outstripping supply and there exists substantial potential for property investment.

Before submitting an Application for Shares in the Company, potential investors should read this Prospectus in its entirety and seek professional advice from an accountant, stockbroker, solicitor or other professional advisor for the purpose of making an informed assessment of the assets and liabilities, financial position, and prospects of the Company.

Opportunity awaits

Toowoomba is Australia's largest inland regional city and as the major centre of the Darling Downs, it is an important provider of healthcare, education, banking, goods and other services to the region.

The Toowoomba region has a population of over 90,000 and until recently, has recorded slow but steady growth[^]. One factor that may have impacted this in recent years has been issues with inadequate water supply which resulted in a heated and highly publicised debate over the possibility of taking drastic recycling measures to solve its shortage. This important issue was ultimately resolved with a \$187 million dollar pipeline to bring water from Wivenhoe dam completed in December 2009*. Combined with the existing dams and Groundwater bores, Toowoomba is expected to have adequate water supply for up to at least 2050[^].

Good growth prospects

Numerous major projects are expected to have a positive economic impact on the city and surrounds over the coming years.

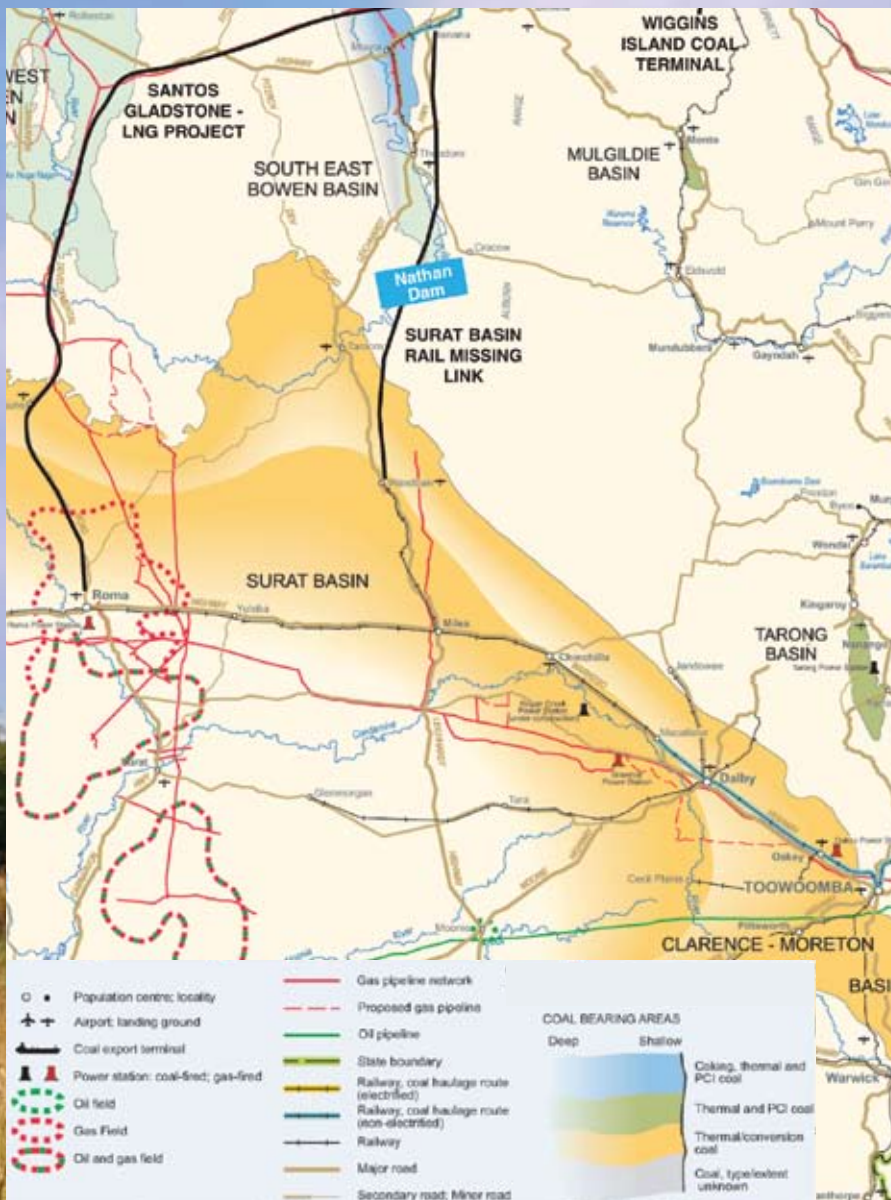

Just 13km west of Toowoomba city at the intersection of the Warrego, New England and Gore Highways, 2,000 hectares of land known as the Charlton Wellcamp Enterprise Area is earmarked to be an important catalyst for business growth. The Toowoomba Regional Council (TRC) says this industrial area has the potential to provide up to 15,000 jobs and increase the TRC area's Gross Regional Product (GRP) by about 30%.

It is also an important part of other major proposed and planned projects: The Melbourne to Brisbane Inland Rail project and the Surat Basin Rail would both run through the Charlton Wellcamp area and a major intermodal freight centre is proposed for the site, bringing a strong freight focus to the TRC area[^].

Undoubtedly, the most important factor in the future development of Toowoomba is the resources boom that is building momentum in the Surat Basin, nearby in the Surat Energy Resource province.

[^] Toowoomba Regional Council Economic Profile, July 2010. www.toowoombaRC.qld.gov.au

* The Australian, 20 May 2010. Article "Change of fortune sees inland centre bracing for boom" by Terry Ryder.

The Surat Basin covers 27,000 km² and crosses three Government areas including the Toowoomba Region. This area contains the majority of the State's known Coal Seam Gas reserves and is expected to be Australia's largest energy province by 2011.

Thousands of jobs will be created in the region and the flow on demand for housing, manufacturing, consumables and infrastructure will be felt throughout the region. As the largest city in the area, Toowoomba will be the major drive in / drive out centre for the region and its economy should experience a boost on the back of the increased demand across multiple sectors.

Multi billion dollar contracts are already in place for the export of LNG from the Surat Basin.

The \$1 billion Surat Basin rail line (planned for completion in 2012) is an important component of the development of the Surat mining industry as it will transport raw materials from the extraction areas to Gladstone from where it will be exported. A gas pipeline will follow the same route as the rail.

In its July 2010 Economic Profile, the Toowoomba Regional Council states, "Toowoomba, the region's major city is poised to be the gateway to the Surat Basin, offering a high level of health and education services, machinery and fibre composite manufacturing and food processing. The population in the region was 199,000 in 2008 and with an estimated population increase of 44% by 2021. 90% of this is expected to be in the Toowoomba Regional Council area."

The TRC is also planning to upgrade Toowoomba's airport to allow for regular services from major cities such as Sydney and continues to work toward the development of the Toowoomba Bypass project which they believe would add over \$300 million to the Darling Downs economy.

The scale of the development of infrastructure and industry around Toowoomba is staggering and with so many projects planned to roll out simultaneously, we believe the once sleepy old city is likely to become a hive of activity, growth and development over the coming years[^].

*Please note: As at the date of this Prospectus no development application has been approved.

Livability & appeal

Further to the enormous infrastructure and industry projects involving Toowoomba, the city offers many features that are important considerations for property development.

Known as the “Garden City”, Toowoomba is an attractive place with many established parks and gardens and hosts its annual Carnival of Flowers which attracts thousands of visitors. The city is also renowned for its numerous high quality education and healthcare facilities making it a very appealing area for young families.

Unemployment rates are low by state standards and a broad-based economy provides a wide range of work options which should only expand as new developments roll out[^].

Although Toowoomba is technically a city by population measures, it retains the feel of a country town and remains largely unaffected by issues that have a negative impact on livability in larger cities.

[^] Toowoomba Regional Council Economic Profile, July 2010. www.toowoombaRC.qld.gov.au

The Garden City is blossoming

While local and state governments scramble to provide major infrastructure to cater for growth and increased demand, they're also focusing on attracting private capital into the area and this is good news for property development.

The median house price in the TRC area in the 1st quarter of 2010 was \$300,000, some 10.3% up on the same period in the previous year. Residential dwelling approvals in the TRC area increased 33.1% over the same period. ^ According to the Toowoomba Regional Council Economic Profile, July 2010 report, house prices in the region had grown 34.4% over the last 5 years^.

It is quite reasonable to expect that as Toowoomba plays its part in the continued development of the Surat Basin and inland freight projects, its economy will grow and prosper.

The Board believes that this should create greater wealth in the area and, coupled with a growing population, an increased demand for appealing residential and lifestyle options within close proximity to the city centre.

The Board has been working with the TRC and Toowoomba based architects Aspect Design to design a "precinct" style project for the Ruthven St (New England Highway) parcel of land, of which a Development Application was lodged with TRC on 18th May 2011. However, at the date of this Prospectus, no Development Application has been granted with respect to this project. Accordingly, any development plans of the Company may be subject to change and may or may not occur.

Located on Ruthven St (New England Highway) between Healy and South Streets, The Epicurean would be within walking distance to the city Golf Club, the GPO and retail centre of town.

These plans and designs are conceptual in nature. As at the date of this prospectus no approvals to construct this project have been obtained by Vertua Limited. The precinct would be positioned as the best Toowoomba has to offer - a leading edge complex that would compete with that of any major city, designed specifically for Toowoomba with an emphasis on its local appeal.

The development is designed in line with trends observed in other cities toward creating hot spot precincts or localities of their own. An example of a successful Queensland development of this nature is "The Emporium", located in Brisbane's New Farm / Fortitude Valley area.

A generous provision for parking underground will be included and commercial tenants will enjoy high visibility and easy access for customers.

These plans and designs are conceptual in nature. As at the date of this prospectus no approvals to construct this project have been obtained by Vertua Limited. SECTION 5

Company & Project Overview

Company & Project Overview

SECTION 5

The information provided in this section is only a summary. Potential Investors should read the entire Prospectus before making a decision to apply for New Shares.

5.1 ABOUT THE COMPANY

Vertua Limited is a property investment company with a single investment in a development site in Toowoomba, Queensland. The mandate of the Company is to acquire property with development potential and over time to realize that potential. The Company listed, as Property Fox No.2 Limited, on the National Stock Exchange of Australia on 28 February 2007. As disclosed in the financial report for the period ended 30 June 2011, the Company is currently focused on its Toowoomba development project. The Company is currently managed by Mr Benjamin Doyle and a Board of highly skilled Directors.

By 30 June 2010, the Company was able to complete a compulsory acquisition of Property Fox No.1 Limited. Accordingly, Property Fox No.1 Limited is now a wholly owned subsidiary of the Company. This has consolidated the ownership of the entire Toowoomba properties in the Company and its subsidiary. The compulsory acquisition was completed on 29 June 2010.

5.2 INVESTMENT STRATEGY OF THE COMPANY

The investment strategy of the Company is to endeavor to invest across a broad range of property related investments. It is intended that the Company will gain exposure to a range of projects, providing the benefits of geographical diversification, while maintaining strong risk-adjusted investor returns.

The Company may undertake the following types of investments:

- Investing in equity or mezzanine/loan debt capital (either directly or indirectly through other entities) in quality property developments being undertaken by proven property developers, offering the potential for appropriate risk adjusted returns;
- Acquiring or investing directly or indirectly in income producing properties with an opportunity to create value for investors through active asset management (such as re-leasing, refurbishment and repositioning) with the aim of delivering enhanced income returns; and

- Investing in assets from which the Company will seek to make short-term development profits.

5.3 CURRENT AND POTENTIAL PROJECTS OF THE COMPANY

The purpose of the Offer outlined in this Prospectus is to provide the Company with funds for ongoing working capital to evaluate and invest in new projects and fund existing projects as required.

In the last year, Mr Benjamin Doyle has been actively seeking new projects that will provide returns to investors, as well as managing the existing properties held by the Company.

Provided below is an update on a few of the Company's current and potential projects:

5.3.1 Toowoomba, Queensland

It is the vision of the Company to build a landmark development in the Garden City of Toowoomba. The current development proposal is that the site will consist of restaurants, retail outlets, cafés and commercial premises as well as a large residential component with landscaped gardens and outdoor eatery areas. It was the original vision of Mr Peter Spann, Vertua Limited and Property Fox No.1 Limited to purchase a parcel of land in one of the strong epicenters in Queensland that could be held as a positive cash flow asset with a long term view to develop into a development site.

The Company is very pleased with the progress it has made on the Toowoomba development project. After many months working with the architects, town planners and local agents, the Company's architects met with the local council to discuss its development proposal. Some exceptional news about the site and allowable density and the Toowoomba Council requirements came from this meeting. Accordingly, the plans went back to the architects to further develop, with an increase to the site by adding units and commercial premises that could potentially lead to higher returns. The Company has also been able to negotiate and secure an option over a parcel of land which has now increased the development site by a further 749m².

A Development Application was lodged with council on the 18th May 2011 and we anticipate approval early 2012, the Board is also very positive that the development will exceed the original estimations for development returns.

5.3.2 Existing Residential Apartment Buildings, New South Wales

An excellent opportunity exists for the Company to extend its activities into the development of apartment buildings and benefit from the vast experience of Mr Benjamin Doyle in this area. During the last nine years Mr Doyle has purchased, renovated and sold or project managed over 46 residential apartment buildings totaling over 350 apartments. For a brief overview of the track record of Mr Doyle, you can view his website at www.fiducia.com.au. The Company is planning to purchase and renovate and/or enter into joint venture agreements to buy and renovate small to medium sized residential apartment building projects. It is planned that any such building project will be located in the eastern suburbs and/or the inner north shore of Sydney up to and including a radius of approximately 10 kilometres from Sydney's CBD. This is a very good opportunity for the Company to diversify into projects with a faster turnover and good potential cash flow.

For more information on the activities of the Company please see the announcements of the Company outlined at Section 8.4.3 of this Prospectus.

SECTION 6

Risks of Investment

As with any share investment, there are a number of risks, both of a general nature and specific to the Company, which may affect the future operating and financial performance of the Company and the value of an investment in the Company. Due to the inherent uncertain nature of the property industry, an investment made under this Prospectus should be considered speculative. Qualifying Investors should realise that the value of their investment may fluctuate considerably due to many influences. This section identifies and describes certain risks associated with an investment in the Company, but should not be taken as an exhaustive list of the risk factors to which the Company and its Shareholders are exposed.

Whilst the Company will attempt to minimise the following risk factors through the use of safeguards and appropriate systems and controls, many are outside the control of the Company and cannot be mitigated. No assurances can be given that any of the risk factors will not adversely impact the Company.

Accordingly, prior to making an investment decision, Qualifying Investors should carefully consider all information contained in this Prospectus including the following risk factors. Qualifying Investors should consult their professional advisor and seek independent advice before deciding whether to apply for Shares under this Prospectus.

6.1 GENERAL RISKS

6.1.1 Investment Risk

Investors should be aware that there are risks associated with investment in shares of companies listed on a stock exchange. The Shares to be issued pursuant to this Prospectus should be considered speculative. The Shares carry no guarantee with respect to the payment of dividends, returns of capital or their market value.

The value of the Company's Shares can be expected to fluctuate depending on various factors including general worldwide economic conditions, changes in government policies, investor perceptions, movements in interest rates, foreign exchange rates and stock markets and variations in the operating costs of the Company. Accordingly, assuming that the Shares to be issued pursuant to this Prospectus are granted official quotation by the NSX, the price at which an investor may be able to trade the Shares on the NSX may be above or below the issue price paid for the Shares.

While the Directors commend the Offer, each Qualifying Investor should make their own assessment of the likely risks and determine whether an investment in the Company is appropriate to their own circumstances. Qualifying Investors in doubt about investing in Shares should consult their stockbroker, accountant, lawyer or other professional advisor.

6.1.2 Share Market Fluctuation

There are risks associated with any investment in a company listed on a stock exchange such as the NSX. Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors including, but not limited to, the following:

- economic conditions in Australia and overseas, which may have a negative impact on equity capital markets;
- changing investor sentiment in the local and international stock markets;
- changes in domestic or international fiscal, monetary, regulatory and other government policies; and
- developments and general conditions in the markets in which the Company proposes to operate and which may impact on the future value and pricing of shares.

Indeed it is noted that over the last three (3) years there has been dramatic volatility in global share markets.

6.1.3 Economic Risk

Economic factors beyond the control of the Company, such as changes in commodity prices, interest rates, inflation, exchange rates and taxation, may negatively impact on the Company's activities, as well as its ability to fund those activities and the revenue and profitability of the Company.

The future viability of the Company is also dependent on a number of other factors affecting performance of all industries and not just the property industry including, but not limited to, the following:

- general economic conditions in Australia and its major trading partners;

Risks of Investment

SECTION 6

- the strength of the equity and share markets in Australia and throughout the world, and in particular investor sentiment towards the property industry;
- movements in, or outlook on, interest rates and inflation rates; and
- natural disasters, social upheaval, war, terrorist attacks or hostilities in Australia or overseas can result in a decline in economic conditions worldwide or in a particular region, which could produce an adverse effect on the business, financial position and financial performance of the Company.

Adverse changes in economic conditions such as interest rates, exchange rates, inflation, government policy, international economic conditions and employment rates (amongst others) are outside the Company's control and have the potential to have an adverse impact on the Company and its operations.

6.1.4 Regulatory Risks

The Company is exposed to changes in the regulatory conditions under which it operates. Such regulatory changes can include, for example, changes in:

- taxation laws and policies;
- accounting laws, policies, standards and practices;
- property laws and regulations that may impact upon the operations and processes of the Company; and
- employment laws and regulations, including laws and regulations relating to occupational health and safety.

6.2 COMPANY SPECIFIC RISKS

6.2.1 Industry Risks

The Company operates in the property sector. Any variation in the level of activity in this sector will be influenced by factors that may have an adverse effect on the operating results of the Company and are beyond the control of the Company including:

- Property prices and supply and demand;

- Interest rates;
- Competitiveness of Australian building and construction operations;
- Availability and cost of key resources including people, equipment and critical consumables; and
- Local, State and Federal Laws, Regulations and Taxation.

6.2.2 Competition Risk

The Company faces competition in its business, to the extent that there are new entrants or changes in strategy by existing competitors of the Company. While the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the projects and business of the Company.

6.2.3 Property Investment Risk

The following are specific risks associated with any property investment company and in the Shares of a company whose activity is investment in, and development of, real estate. Many of the risks are outside the control of the Company.

Significant risks and effects are listed below:

- Unexpected structural defects or building deficiencies being encountered resulting in unexpected expenses being incurred for repair or refurbishment;
- Increases in interest rates occurring resulting in the Company incurring increased holding expenses including additional interest on borrowings;
- Increases occurring in the cost of building materials and of labour resulting in increased cost of repairs and refurbishment;
- A downturn in the property market occurring (for reasons such as increases in interest rates, cyclical movement in the real estate market and depressed or unstable general economic conditions) resulting in delays being incurred in re-sale of properties and/or depressed prices being achieved on the re-sale of properties and/

or the Company having to incur increased interest and other holding costs;

- Variations occurring in the real estate market between supply and demand causing adverse fluctuations in real estate prices;
- Management problems being experienced in relation to rent collection, disputes with building and other trade contractors and tenants' disputes;
- Changes being effected to laws relating to property development (including laws relating to zoning and town planning restrictions on land use, environmental controls, landlord and tenancy controls, user restrictions, stamp duty, land tax, income taxation and capital gains tax). These changes could adversely affect the profitability and viability of real estate development operations;
- Should town planning approval be required for any transaction then unexpected delays and increased holding costs may be encountered whilst the application is proceeding. It is possible that any approval will not be granted or will be granted on unfavorable terms;
- Improvements effected to property do not necessarily result in increases in value. Increases in value may not always occur at a steady rate or in line with expenditure on improvements;
- A purchase contract not being completed (either because of seller's default or for any other reason) resulting in the company losing the benefit of any repairs or refurbishment it may have undertaken and paid for in relation to the subject property and/or the company entering into litigation with a defaulting seller and thereby incurring legal expenses;
- If as a result of any of the risk factors set out above or any other untoward circumstances the Company requires further funds in order to meet operational expenses including expenses associated with the holding and/or developing of any parcel or parcels of real estate acquired by it then the Company may, in the discretion of the Directors:

- undertake a further public capital raising; and/or
- borrow funds (or further funds) from a bank or other financial institution; and/or
- liquidate the company.

Each of these actions could result in the value of your investment (Shareholding) being diminished;

- Your Shareholding will potentially diminish in value if properties acquired by the Company are unable to be sold in a timely manner at acceptable prices or if the Company is required to meet higher than expected interest charges on borrowings and other holding expenses;
- Timing of acquisitions and sales in the real estate property market in order to maximize profits and minimize losses on trading is extremely difficult, even for experienced professional investors. If the property market suffers a downturn during the course of the Company's trading operations then the Company may, in order to avoid or minimize losses, need to hold real estate acquisitions for longer periods than would otherwise apply; and
- It is possible that moneys expended by the Company on real estate acquisitions and on repairs and refurbishment and on interest, holding and operational costs may exceed the proceeds of the sales.

6.2.4 Reliance on Key Personnel

The responsibility of overseeing day-to-day operations and the strategic management of the Company is concentrated amongst a small number of key executives. The loss of any such key employees could have the potential to have a detrimental impact on the Company until the skills that are lost are adequately replaced.

6.2.5 Industrial Disputes

Industrial disputes may arise from claims for higher wages and/or better working conditions in the industry in which the Company operates. This could disrupt operations and impact on the future profitability of the Company.

Risks of Investment

SECTION 6

6.2.6 Future Capital Needs

The Company's capital requirements depend on numerous factors. Further funding of projects may be required by the Company to support its ongoing activities and operations. There can be no assurance that such funding will be available on satisfactory terms or at all. Any inability to obtain funding will adversely affect the business and financial condition of the Company and, consequently, its performance. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its investment programs as the case may be. Additionally, any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities.

6.2.7 Insurance risk

The Company intends to adequately insure its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with property investment and property development is not always available and where available the costs can be prohibitive.

6.2.8 Related Party Risk

As the Company has various contracts, disclosed in Section 8 of this Prospectus, with related parties, including Freedom Factory Pty Ltd (an entity associated with Mr Peter Spann) and Woolcott Corporate Development Pty Ltd (an entity associated with Mr Howard Woolcott) and Fiducia Estate Agents Pty Ltd (an entity associated with Mr Benjamin Doyle) there is the risk, to investors and potential investors that these contracts are not on arms length commercial terms. The Directors of Vertua Limited believe that all contracts entered into by the Company with related parties are on arms length commercial terms and are in compliance with the Listing Rules of the NSX and the Corporations Act.

7.2.2 Qualifications

- Movements in retained earnings/accumulated losses and in the asset and liability levels during the period between 30 June 2011 and the date when the Offer is completed;
- An inability to calculate the New Shares taken up until the Closing Date; and
- The Board may or may not chose to engage securities brokers to assist in this capital raising and reserves the right to pay up to 7% commission on any funds raised.
