Interim Financial Report

NOTES TO THE CONDENSED FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 31 DECEMBER 2011

NOTE 1: SIGNIFICANT ACCOUNTING POLICIES

Basis of Preparation of the Condensed Financial Statements

The half-year condensed financial statements are a general purpose financial report prepared in accordance with the requirements of the *Corporations Act 2001* and Australian Accounting Standard *AASB 134: Interim Financial Reporting*. Compliance with AASB 134 ensures compliance with International Financial Reporting Standards IAS 34: Interim Financial Reporting.

It is recommended that this financial report be read in conjunction with the annual financial report for the year ended 30 June 2011 and any public announcements made by Illuminator Investment Company Limited during the half-year in accordance with continuous disclosure requirements arising under the *Corporations Act 2001*.

The half-year report does not include full disclosures of the type normally included in an annual financial report. The accounting policies and methods of computation adopted in the preparation of the half-year financial report are consistent with those adopted and disclosed in the company's 2011 annual financial report for the financial year ended 30 June 2011.

The Company has adopted all of the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (the AASB) that are relevant to their operations and effective for the current reporting period.

New and revised Standards and amendments thereof and Interpretations effective for the current reporting period that are relevant to the Company include:

- Amendments to AASB 1, 7, 101 and 134 as a consequence of AASB 2010-4 *Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project*
- Amendments to Australian Accounting Standards as a consequence of AASB 2010-5.

The adoption of these amendments has not resulted in any changes to the Company's accounting policies and has not affected on the amounts reported for the current or prior periods.

(a) Holdings of Securities

(i) Statement of Financial Position classification

The Company has two portfolios of securities, the investment portfolio and the trading portfolio.

The investment portfolio relates to holdings of securities which the directors intend to retain on a long-term basis, and has been classified as a non-current asset.

The trading portfolio comprises securities held for short term trading purposes and is classified as a current asset.

(ii) Valuation of investments

Securities, including listed and unlisted shares, notes and options, are initially brought to account at cost (including any associated transaction costs) and are continuously carried at fair value.

Fair value for the purposes of valuing holdings of securities is determined by reference to market prices prevailing at balance date, predominantly last sale price, where the securities are traded on an organised market. Where a security is not so traded, its fair value is determined by the Directors.

(iii) Gains and losses on investments

Investment portfolio

All gains and losses (realised and unrealised) on equity instruments held in the investment portfolio are reported as "Other Comprehensive Income".

Cumulative gains and losses are transferred from the investment revaluation reserve to retained profits or the realised capital gains reserve when the investments are sold. The realised capital gains reserve is used primarily to record gains upon which Capital Gains Tax has been or will be paid, and which consequently are available for distributions to shareholders as Listed Investment Company Capital gains, which enable many shareholders to claim some of this as a tax deduction.

Illuminator Investment Company Limited

ABN 48 107 470 333

Interim Financial Report

**NOTES TO THE CONDENSED FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED
31 DECEMBER 2011**

NOTE 1: SIGNIFICANT ACCOUNTING POLICIES

Trading Portfolio

Realised and unrealised gains and losses arising from changes in the fair value of the trading investments are included in the Income Statement in the period in which they arise.

(iv) Income from holdings of securities

Distributions relating to listed securities are recognised as income when those securities are quoted ex-distribution basis. Distributions relating to unlisted securities are recognised as income when received unless the distributions are capital returns in which case the amount of the distribution is treated as an adjustment to the cost base of the securities.

(b) Income Tax

The Company adopts the liability method of tax-effect accounting whereby the income tax expense is based on the profit from ordinary activities adjusted for any non-assessable or disallowed items.

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled. Deferred tax is credited in the income statement except where it relates to items that may be credited directly to equity, in which case the deferred tax is adjusted directly against equity.

Deferred income tax assets are recognised to the extent that it is probable that future tax profits will be available against which deductible temporary differences can be utilised.

The amount of benefits brought to account or which may be realised in the future is based on the assumption that no adverse change will occur in income taxation legislation and the anticipation that the company will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

(c) Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

(d) Excess of Current Liabilities over Current Assets

At 31 December 2011, the Company has current assets of \$16,756 and current liabilities of \$337,053, a deficiency of \$320,297. The financial report has been prepared on a going concern basis, which contemplates the realisation of assets and satisfaction of liabilities in the ordinary course of business. The Directors will realise a portion of the Company's investment portfolio to enable the Company to meet any debts as and when they fall due and payable if required. It is on this basis that the going concern assumption is appropriate.

We conducted our review in accordance with Australian Auditing Standard on Review Engagements ASRE 2410 *Review of Interim Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of Illuminator Investment Company Limited's financial position at 31 December 2011 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*. A review of half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Accordingly, we do not express an audit opinion.
