SHARE CAPITAL MOVEMENT HALF YEAR 31 DECEMBER 2011

It has come to our attention that the movements in share capital reported in the Half Yearly Report for 31 December 2011 are incorrect. The dollar values reported were correct. The clarification relates to the number of shares only.

The correct movement in share capital is as follows:

	No of Shares
Opening balance 1 July 2011	342,765,769
Increases through issues during the half year	26,466,664
Closing balance 31 December 2011	369,232,433

We have today lodged an amended Half Yearly Report with NSX.

Any queries relating to this matter should be directed to the Company Secretary.
