Reason for renewal:

The Company has an approved Work Plan, and Tailings Storage Facility. The Work Plan anticipates reprocessing of tailings existing at surface. Field trials at working levels in year 2012 demonstrate the presence of clay-like minerals which clog the surface of carbon. Subsequent off-site tests are believed to have overcome this constraint, as was partly described on page 10 of 95, the approved Work Plan.

4. Program of work:

Continue with the Work Plan as originally envisaged, using purpose-designed equipment to enable the self-cleaning of carbon during processing at site.

The identified mineral (gold) resource is now considered to be a recoverable resource. Continue mining operations on site.

5. Estimated expenditure for next five years:

\$ 5,000,000. (subject to progressive gold recovery)

6. Term of renewal required:

5

year/s

7. Signature of applicant(s) see notes 1 and 2 below:
