**MOUNT ROMMEL MINING LIMITED (MMT)
ANNOUNCES RESUMPTION OF DRILLING AT CLUNES.**

In late 2014, MMT was granted the exploration licence EL 5492. The area of this licence encompasses Victoria's First Gold Town, It therefore surrounds the small mining licence MIN 5391 held by the Company for over 10 years. Mount Rommel also holds another adjacent exploration licence at Clunes, EL 5488.

Taken together, all the rights held by the Company are such as should assure investors resumption of the year 2007 drilling program is now commercially sensible.

All these granted rights are subject to standard compliance clauses, and of course, the requirements of law.

Licence documents in their entirety are made available for the review of Auditors to the Company.

Prior drilling in MIN 5391 has indicated that gold remains at numerous places in the core area central to the historic workings. Details were published on NSX from time to time.

Diamond drilling is to resume at Clunes within a few days.

The initial work begins at a location 45 metres south of hole CD06-05, just west of Scenic Road, probing into the same core area. More details will be provided shortly.

Any person(s) seeking to acquire Ordinary shares in the Company by requests to Directors (that is, by email to fhunt@mountrommel.com) **are advised to do so within seven (7) days.**

Thereafter, applications made to Directors may be declined.

F.L.Hunt,
for Mount Rommel Mining Ltd.
