25 August 2015

PUBLIC INFORMATION, CLUNES GOLDFIELD. SUMMARY OF MODERN EXPLORATION DATA TO YEAR 2008.

This data is available using [GSV search assistant](#), together with supporting references.

The Summary demonstrates a continuing series of activity over many years, describing numerous initiatives.

The internet link is as follows -

http://geology.data.vic.gov.au/mineral/EL3000/el3262/EL3262_G47896_GSV_sum.pdf

By publication of this link here, the Directors of Mount Rommel Mining Ltd. are ensuring all in the Clunes community have a fair, and reasonably independent, means of gaining information about work going on for many years around the town of Clunes.

This data summary includes a listing of drilling year on year, for a total of 7224.8 metres. No drilling by Mount Rommel is included in this list, but 4 holes drilled in January 1996 due pass within MIN 5391.

For the record, in August 2014, Mount Rommel purchased the available core of holes BBC 1, 2, 3, part of 4, and 5.

This summary shows no sampling of hole BBC 1 took place during the tenure of EL 3262. Mount Rommel is in the process of investigating this core, thoroughly.

The Directors of Mount Rommel also consider this GSV summary may be useful to those interested in depositing a tender in response to the advertisement of the Company, which appears below.

CLOSING DATE - 31 AUGUST, 2015.
