INFORMATION FOR MEMBERS, MOUNT ROMMEL MINING LTD.

DRILLING RESUMES AT CLUNES.

Any person who passes along Scenic Road, Clunes, will observe a drilling rig is on site, towards the old Port Phillip North shaft.

The drill site is on private land of the Company. The site is about 130 metres to the north from the well-known bend in Scenic Road.

The new hole is depressed 74 degrees, drilling to the west.

At close of shift Saturday, **hole CD15-07** was through the surface waste rubbish, and drilling ahead at depth 12 metres.

Current intentions are to continue this new hole to locate the same gold-mineralized structure as found in hole CD07-04, at about depth 115 metres.

The new hole is planned to intersect that objective at about 38 metres north of hole CD07-04. This position would be 40 metres south of the old Port Phillip North shaft.

The results of excellent assays for hole CD07-04 are published on NSX - see the release dated 18 June 2007.

Further information will be provided to NSX about Monday 16th November.

F.L.Hunt,
On behalf of Directors, Mount Rommel Mining Ltd.
