INFORMATION FOR MEMBERS OF THE COMPANY

PROGRESSIVE DEVELOPMENT CONTINUES AT GLENFINE

On behalf of every Shareholders, Mount Rommel Mining Ltd., the Directors congratulate all those persons who have in so many ways contributed to the present stage of completion of the processing plant at Glenfine. The congratulations are indeed well-deserved.

This plant represents the result of many hours of *"blood, sweat, and tears"*, soon forgotten in the steady advancement steps now seen to be taking place at site.

The sands within MIN 5492 at Glenfine only become a resource for our Company due to this design and construct achievement - a fit-for-purpose one-off plant assembled on site.

This plant is small in size, large in capability, with an outcome pre-determined to be beneficial to the Glenfine local environment.

The plant runs batch operations, to pass through it the waste sands existing at site.

In this settling-in period, running with one prime pachuca tank each batch, the plant is batching about 10 tonnes each 2.5 hours.

This NSX release records the fact that tonnes passed cleanly through the plant now aggregate 100 tonnes.

The continuation of activity with this plant is a matter for shareholder discussion at the AGM next Saturday.

F.L.Hunt,
On behalf of Directors, Mount Rommel Mining Ltd.
