Dear Sirs

Re: Allwellness Holdings Group Limited – Commissioning of Production Facility

Allwellness Holdings Group Limited (NSX: AWH) is pleased to advise that during December 2018, the Company's new production facility at Pendle Hill received all regulatory approvals and that the facility has commenced production of pharmaceutical products from January 2019.

The new facility will enable the Company to process orders more flexibly, and also allow it to maintain lower inventory levels. The facility will allow AWH to process both large and small size orders, including providing OEM services for other businesses.

The Company's Chairman Mr Yong Zhang said:

"The new facility will us to process orders as they are received and reduce our need to have product on the shelf. We can now accept smaller orders which should boost revenue and be more profitable."

Yours faithfully

Andrew Bristow
Secretary
