However, if some Shareholders take up their Entitlements, Shareholders who do not take up all of their Entitlements will have their interest in SPS diluted.

The Company seeks to make the Entitlement Offer to all Shareholders and has extended the Entitlement Offer to Shareholders with registered addresses in the Prescribed Jurisdictions. Accordingly, if all other Shareholders take up their Entitlement, foreign Shareholders with registered addresses in the Prescribed Jurisdiction (at the date of this Offer Booklet) will not be diluted as a consequence of the Entitlement Offer, unless they elect not to take up their Entitlements.

3.4 Related Party

4. Risks

Risk	Description
Strategic risk	Consumer behaviours continue to be influenced by such factors as economic conditions, adverse fluctuation in interest rates and choices in both online and in-store retail options.
General economic conditions and market risks	Any adverse market conditions including increased competition from new and existing competitors, interest rate and foreign exchange movements may lead to a decline in sales and profitability.
Loss of premises	SPS leases facilities. Damage or destruction of these facilities could result in the loss of products and hence adversely impact SPS's financial results, despite SPS holding insurance cover for such an event.
SPS products	SPS's success in generating profits and increasing its market share is based on the success of its key products. Reliance on key products makes SPS vulnerable to negative publicity or reduced sales from product quality.
Risks associated with an investment in shares	<p>There are risks associated with investments in shares. The shares trading price is affected for a number of reasons all outside the control of SPS:</p> <ul style="list-style-type: none"> • Movements in Australian stock markets; • Changes in investor sentiment; • Preventing Australian and international economic conditions and outlook; • Changes in interest rates • Change in government or regulation and policies

Risk	Description
Equity raising dilution risk	If shareholders do not participate in the rights issue, then their percentage shareholding in SPS will be diluted.
Information technology systems failure	There is a risk that SPS fails to finish or maintain its Software adequately, or that updates may introduce errors and performance issues, adversely impacting revenue and causing customer satisfaction in the Software to fall.
Regulatory risk	The manufacturing activities of SPS are subject to various regulatory requirements. Failure by SPS to comply with specified regulations may result in closure of production facilities or the inability to market SPS products for therapeutic use resulting in the loss of revenue and profitability.
Taxation losses	The ability of SPS to obtain the benefit of existing tax losses will depend on future profitability and may be adversely affected by changes in business activities, levels of taxable income and profitability relating to the use of the tax losses. Changes in taxation laws (or their interpretation) in Australia could materially affect SPS's financial performance and impact on its ability to obtain the benefit of existing tax losses.
Accounting	Changes in accounting or financial reporting standards may adversely impact the reported financial performance of SPS.
Failure to realise benefits from product development costs	Developing software and technology is expensive and the investment in the development of these product offerings often involves an extended period of time to achieve a return on investment. However, SPS may not receive significant revenues from these investments for several years, or may not realise such benefits at all.
