A MESSAGE FROM THE CHAIRMAN

Dear Fellow Shareholders

On behalf of the Board and Management of Beroni Group Limited (“Beroni” or the “Company”), I am pleased to present the 2025 Annual Report.

The business recovery from the COVID-19 pandemic in China has been slower than anticipated. Consumer confidence has not recovered to the pre-COVID levels amid the struggling property market and declining domestic consumption. However, the Chinese economy has shown strong signs of turnaround in 2025 and we are optimistic that we will see stronger sales in the Chinese market in the coming years.

Financial Performance

Beroni reported FY2025 revenue of \$0.64 million (FY2024 \$0.32 million), and underlying EBITDA of -\$4.21 million (FY2024: -\$10.17 million) and NPAT -\$4.46 million (FY2024: -\$10.93 million). Due to the sales of our other products and services in China and Japan, this year’s sales have increased by 101% over the previous year’s sales.

We are continuing to explore new ways to grow our business by developing new products and services and new distribution channels. We are also considering expanding our sales to other markets and broadening our customer base.

On the expenses front, overall expenses (excluding cost of sales) in 2025 of \$5.02 million are significantly lower than the \$11.49 million in 2024 which are mainly attributed to the decrease by \$4.9 million of the share-based compensation payments and the \$3.6 million reversal of the cost reserve upon expiry of the share options. We are continuing our efforts to streamline our operational costs to improve overall efficiency.

Research and Development

In response to the worldwide surge in precision medicine and next-generation therapeutics, the Group is developing five breakthrough platforms that would position it among the most competitive biotechnology enterprises internationally:

1. World-leading Brain-Computer Interface (BCI) technology
2. PENAO broad-spectrum anti-tumour drug
3. The world’s first dual-target nucleic acid aptamer drug
4. Meta NKT cell therapy
5. AI multi-modal tumor diagnosis and analysis platform

Beroni Group is targeting a major strategic leap by the end of 2026 and laying the foundation to become a globally recognised innovator in precision medicine. It is always Beroni’s strategy to always explore research programs with significant potential value and benefits and to collaborate with industry partners in the international markets.

Our Vision

Our vision has not changed and our aim is to become a world’s leading player in the biopharmaceutical industry by developing and commercialising innovative drugs and therapies to address significant unmet medical needs worldwide and to improve overall human health. As mentioned in my previous year’s report, we have been pursuing the following strategies:

- Advance key product candidates with a focus on cancer and infectious diseases;
- Identify and develop additional product candidates through clinical development in order to expand our current pipeline;
- Strengthen our position in the development of innovative drugs and therapies;

- Expand our e-commerce business by growing our portfolio of pharmaceutical and health products;
- Identify, evaluate and pursue strategic merger and acquisition opportunities in new markets like EU and the Middle East to expand our global footprint;
- Develop a culture of scientific excellence to drive future innovations.

Once again, I would like to thank the board of directors, management team and staff for their hard work and commitment in taking the business to the next level in 2026 and beyond. And I would also like to thank our shareholders for their support and interest in our company.

Boqing (Jacky) Zhang
Chairman and Chief Executive Officer
31 March 2026

Directors' Report

The directors present their report, together with the financial statements on the consolidated entity (referred to hereafter as the 'Group') consisting of Beroni Group Limited (referred to hereafter as the 'Company' or 'Beroni') and the entities it controlled at the end of, or from 1 January 2025 to 31 December 2025.

Directors

The following persons were directors of Beroni during the whole of the financial period and up to the date of this report, unless otherwise stated:

Jacky Boqing ZHANG (Executive Director, Chairman)

Hai HUANG (Executive Director)

Peter Yap Ting WONG (Executive Director, CFO)

Libing GUO (Non-executive Director)

Dr Richard BUCHTA (Non-executive Director)

Nicholas ONG (Non-executive Director)

Company secretary

Nicholas ONG

Information on Directors

(a) Jacky Boqing Zhang

Mr Zhang is the founder, Chairman and CEO of Tianjin Beroni and is the Chairman of the Company. He has gained extensive marketing, operational and research experience in the biotechnology sector. He holds a Bachelor's Degree in Biotechnology from Tianjin University of Commerce, an MBA from Nankai University, a MSC in International Management from the University of Sussex and an EMBA from Tsinghua University.

Mr Zhang has previously worked in different roles including Head of Human Resources, Project Manager of R&D, CEO Asia Pacific Region, and Executive Director for companies based in China and the UK. He has a special interest in collaborating with global research institutions on bioscience and medicinal R&D, as well as technology transfer and new product development. He has been instrumental in developing Beroni since incorporation, winning various title recognition programs from the Chinese government such as "Tianjin High and New Technology Enterprise" in 2015, "National High and New Technology Enterprise" in 2016, "Tianjin Patent Pilot Unit" in 2018, and "China Market Credit Enterprise" in 2019.

Mr Zhang is a resident of the PRC.

(b) Hai Huang

Mr Huang is one of the founding directors of Tianjin Beroni. He has a business management degree from the Capital University of Economics and Business in China.

Mr Huang worked for a world Top 500 company for approximately 15 years and was responsible for commodity import and export and domestic trade business. Mr Huang has extensive international trade experience and more than 10 years of experience in business franchising, e-commerce business planning and implementation and team building.

Mr Huang is a resident of the PRC.

(c) Libing Guo

Mr Guo is one of the founding directors of Tianjin Beroni. He has a financial management degree from Henan University.

Mr Guo has approximately 20 years' experience in cold-chain logistics particularly in areas of infrastructure planning, construction, fund raising, allocation of resources and implementation. Mr Guo is also experienced in professional team building, training and management.

Directors' Report (continued)

Mr Guo is a resident of the PRC. He is the Chairman of the Nomination & Remuneration Committee.

(d) Peter Yap Ting Wong

A Chartered Accountant by profession, Mr Wong is a 40-year veteran in the financial services industry. He has gained extensive experience across a wide spectrum of business functions such as audit, taxation, finance, operations, technology, HR, risk management, compliance and control.

Mr Wong started his career in the accounting profession in 1984 and trained with two major international accounting firms - Deloitte and Price Waterhouse Coopers. He subsequently joined several large corporations where he took up senior positions managing large portfolio of functions and people. The companies he has worked with include Citibank, Hong Leong Group (Malaysia), Hong Kong Stock Exchange and Hong Kong Telecom. Before coming to Australia, Peter was in Shanghai, China where he spent 3 years with Citibank China and another 2 years with Shanghai Pudong Development Bank, a strategic partner of Citibank. He travelled extensively within China conducting seminars and giving advice to the staff and management of the Chinese bank.

Having worked in England, Hong Kong, Malaysia, China and Australia, Mr Wong is familiar with the different financial and business practices across Asia. He is well equipped to advise clients on cross-border trade and investment. He focuses on providing financial, taxation and investment advice to Australian and Asian enterprises wanting to invest or do business in the Asia-Pacific region.

He graduated with a BSc (HONS) degree from the University of Manchester, England and a MBA degree from Henley Business School, England. He is currently a Fellow of the Institute of Chartered Accountants in England & Wales and also Chartered Accountants Australia and New Zealand

Mr Wong resides in Sydney, Australia. He is a member of the Audit and Risk Committee.

(e) Dr Richard Buchta

Dr. Richard Buchta has 30 years of experience in product development in pharmaceuticals and vaccines as well as in manufacturing and business development. He has developed and led project teams in the development of over 200 products, of which 80 have been launched in Australia and USA. Richard has worked at both local and multinational pharmaceutical companies including Websters, Wyeth, Astra Zeneca, Stiefel and GSK. He is also a director of Formulytica Pty Ltd, a company providing R&D CRO services in skincare and topical/injectable pharmaceuticals and biologics.

Richard obtained a BSc (HONS) from Monash University, a PhD from Weizmann Institute of Science and University of Trieste, and an MBA (Technology) from Deakin University. He was also a post-doctoral Fellow at the Department of Immunology, John Curtin School of Medical Research, Australian National University.

Dr Buchta is a resident of Australia. He is a member of the Audit & Risk Committee and the Nomination & Remuneration Committee.

(f) Nicholas Ong

Mr Nicholas Ong has served in the Australian Securities Exchange (ASX) for seven years as Principal Advisor, overseeing the admission of more than 100 listed companies. He has gained 16 years of experience in listing rules and corporate governance. He runs a boutique corporate advisory firm in Perth, Western Australia and is also a director or company secretary to a few listed companies in Australia.

Nicholas is a Fellow of the Governance Institute of Australia and Fellow of Institute of Chartered Secretaries and Administrators. He holds a bachelor's degree in Banking and Finance from Murdoch University and a MBA degree from the University of Western Australia. He is the Chairman of the Audit & Risk Committee and a member of the Nomination & Remuneration Committee.

Nicholas is or was a non-executive director of other listed companies as follows:

- Nelson Resources Ltd - November 2022 to Present
- CFOAM Ltd - October 2020 to Present
- White Cliff Minerals Ltd - December 2018 to March 2023
- Oceana Lithium Ltd - February 2024 to March 2024
- Vonex Ltd - June 2018 to March 2023
- Mie Pay Ltd - May 2020 to June 2022

Other income	83,333	268,466	-68.96%
Selling and distribution expenses	-268,137	-671,853	-60.09%
General and administrative expenses	-4,677,960	-11,541,879	-59.47%
Impairment reversals / (losses) on trade and other receivables	-	24,815	N/A
Finance expense	-61,261	-306,660	-80.02%
Finance income	217	66,526	-99.67%
Fair value gain / (loss) on remeasurement of derivative financial	-	1,845,683	N/A
Loss on extinguishment of convertible loans	-	-352,727	N/A
Unrealised foreign exchange (loss) / gain	-13,495	-496,441	-97.28%
Realised foreign exchange (loss) / gain	-2,721	14,011	-119.42%
Loss before income tax	-4,460,236	-10,928,866	-59.19%
Income tax	-742	-721	2.91%
Loss for the year	-4,460,978	-10,929,587	-59.18%
Depreciation	193,575	552,703	-64.98%
Finance expense	61,261	274,894	-80.02%
Finance income	-217	-66,526	-99.67%
EBITDA	-4,206,359	-10,168,516	-58.51%
NPAT	-4,460,978	-10,929,587	11.36%

Directors' Report (continued)

(A) Revenue

Sales revenue has increased by 101% from \$316,816 in 2024 to \$638,298 in 2025 due to the sales of biomedical advice and data by Beroni Guangdong and sales of the health supplement NMN By Beroni Biotech. The business sentiment in China is still weak but is expected to improve in 2026.

Nevertheless, the Company will continue to promote new products and services and also open new platforms or channels to increase its sales. The Company also plans to expand to other geographical markets in the coming year.

(B) Gross Profit

The overall gross profit margin has improved from 70% to 75% in this period which is in line with the past average margin of around 75%.

(C) Other Income

The other income represents mainly \$71,983 R&D tax rebate (2024: \$152,943) received or receivable from the Australian government to support the PENAO drug research in Australia. Last year's R&D tax rebate was higher than this year due to higher expenses incurred.

(D) Expenses

General and administration expenses

The decrease in general and administrative expenses is mainly due to the following changes in share-based compensation expenses:

- In 2025, the Company issued 5,010,000 new shares at \$1.12 amounting to \$5,611,200 to directors and senior employees as incentive shares, whilst in 2024, 4,955,000 shares at \$2.12 per share amounting to \$10,504,600 were issued to directors and senior employees.
- Due to the expiry of the non-vesting share options in June 2025, the share options reserve of \$3,612,011 was credited back to retained earnings in the current year.

Fair value gain on derivative financial liabilities

The conversion of the convertible loans in April 2024 resulted in a fair value gain on derivative financial liabilities of \$1,845,683 and a loss on debt extinguishment of \$352,726 in the previous financial year.

Dividends

No dividends were paid or declared during or subsequent to the end of the financial period.

Directors' Report (continued)

Significant Changes in State of Affairs

1. In March and April 2025, the investor holding USD0.5million convertible notes converted all of them to 200,000 ordinary shares.
2. In April 2025, the Company acquired the brain wave extraction patent from a Japan-based scientist and issued 555,000 shares as payment in kind for the acquisition cost.
3. In June 2025, the Company issued 5,010,000 new shares to directors, employees and senior scientists as incentive shares, following shareholders' approval received on 30 May 2025.
4. On 2 July 2025, the Company elected not to continue with the listing of its shares on the US-based OTCQB market. Consequently, its ticker BNIGF was removed from OTCQB to Pink Limited after that date.
5. In July 2025, Beroni Pharmaceuticals (Guangdong) Co. Ltd., a wholly owned subsidiary of Beroni Group Limited announced it has achieved a significant breakthrough in building its nucleic acid innovative drug platform. This platform provides specialized research and development support to companies developing nucleic acid drugs and focuses on providing or developing advanced targeted liposome-aptamer complexes and multi-target small nucleic acid drugs at the organ, tissue, and cellular levels for our partners.
6. On 21 July 2025, the Company issued 100,000 ordinary shares to a financial adviser as part consideration for the assistance with Nasdaq IPO capital raising and investor relations.

Likely developments and expected results of operations

Information on likely developments in the operations of the Company and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the Company.

Matters subsequent to the end of the financial year

1. Other than the above event, there has not arisen, in the interval between the end of the financial period and the date of this report, any other item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect substantially:
 - a) the Company's operations in future financial years, or
 - b) the results of those operations in future financial years, or
 - c) the Company's state of affairs in future financial years.

Directors' Report (continued)

Remuneration Report (Audited)

This remuneration report, which forms part of the Directors' Report, sets out information about the remuneration of the Company's key management personnel for the financial year ended 31 December 2025.

The term "Key Management Personnel" refers to executive directors and non-executive directors named on page 5.

Remuneration governance and determination

The Board has established the Nomination & Remuneration Committee to govern remuneration of KMPs. The Nomination & Remuneration Committee determines details of remuneration, including nature, amount and make-up of remuneration for KMPs. The Nomination & Remuneration Committee also reviews these details on an annual basis.

Remuneration governance framework

Below is the framework the Board has in place to establish and review remuneration for KMPs and employees of the Group:

- **Board** – the Board approves the overall remuneration framework and policy ensure it is fair, transparent and aligned with long term outcomes.
- **Nomination & Remuneration Committee (NRC)** – the NRC reviews and makes recommendations to the Board on remuneration policies for non-executive directors, senior executives and all employees including incentive arrangements and awards. The NRC can appoint remuneration consultants and other external advisors to provide independent advice.
- **Management** – Management provides information relevant to remuneration decisions and provides recommendations to the NRC.

Principles used to determine the nature and amount of remuneration

The principles used to determine the nature, amount and make-up of remuneration for KMPs are:

- **External Equity:** Deliver market competitive reward packages necessary to attract and retain talented employees, taking into account the employee's geographical location;
- **Performance & Reward link:** Make clear the line of sight between performance and reward to ensure that superior performance is recognised and rewarded, with a view to driving long-term growth and shareholder value;
- **Internal Equity:** Provide fair, consistent and internally equitable reward to appropriately compensate employees for their contributions and performance outcomes;
- **Affordability and Sustainability:** Manage the balance between reward funding and Company performance / financial outcomes;
- **Communication and Governance:** Ensure a level of transparency and clarity in reward design and governance processes.

Directors' Remuneration

Executive and Non-executive Directors receive remuneration for undertaking their role in the form of an annual cash fee and the grant of shares or options to acquire shares in the Company. The options to acquire shares in the Company are issued pursuant to the Remuneration Plan. Details of the share options are outlined in Note 23 of the Notes to the Consolidated Financial Statements.

The purpose and advantage of these Options is to provide a non-cash form of remuneration that further aligns the interests of Directors with shareholders and also promotes an ownership culture by all participating Directors. The remuneration for the executive and non-executive Directors reflects the responsibilities and time commitment necessary for the role, the amount of travel required and the time and diligence required in ensuring open, timely and transparent communication between the various entities of the Group. Directors may also be paid such additional or special remuneration as the Directors decide is appropriate where a Director performs extra work or services which are not in the capacity as a Director of the Company. There are no retirement benefit schemes for Directors other than statutory superannuation contributions.

Directors' Report (continued)

Details for KMPs:

¹ The fair value of shares granted as remuneration is based on the market valuation of the Company conducted by an independent expert in 2024 and updated by management in 2025. The share price of the Company was determined at AUD1.12 (2024: AUD2.12).

² The share options issued to the Directors in July 2021 and amended in May 2022 expired at the end of June 2025, 3 years after the date that they were issued or amended. As the vesting conditions for the share options were not met before the expiry date, they automatically lapsed upon expiry and resulted in the reversal of the accumulated options cost reserves.

Employee share options

Beroni Group Limited has established a Remuneration Plan for its directors and employees. The Remuneration Plan provides flexibility to the Board to grant options to directors and employees. The definition of employee under the Plan Rules includes any full time or permanent part time employee or officer or director of the Company or any related body corporate of the Company.

The executive and non-executive directors received a proportion of their remuneration in the form of shares or options for shares issued by the Company.

Related party transactions

In the year ended 31 December 2025, the Company has engaged the services of Asia Invest Partners Limited to manage its financial and tax affairs in Australia. Asia Invest Partners is owned by the Australian director, Peter Yap Ting Wong. The Company has incurred a total of \$49,273 (excluding GST) for such services rendered in the 2025 financial year (2024: \$37,300 excluding GST). The balance outstanding at the end of the year is \$2,837 (FY2024: \$5,500). Asia Invest Partners also jointly share the Sydney office with Beroni Group. The share of rental paid by Beroni Group in 2025 is \$8,881 (2024: \$9,756).

* The Group completed a share consolidation on 24 November 2023 and the earnings per share and net tangible assets per share for the years from 2020 to 2022 were restated.

End of Remuneration Report

Indemnification and insurance of directors and auditors

During the financial year, the Company paid a premium in respect of a contract insuring the Directors and Officers of the Company, against a liability incurred as such a Director or Officer to the extent permitted by the *Corporations Act 2001*. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

Rounding of amounts

The company is of a kind referred to in ASIC Corporations (Amendment) Instrument 2022/519, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Class Order to the nearest dollar, or in certain cases, the nearest 1/10th of a dollar.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the *Corporations Act 2001* is set out on page 18.

This report is made in accordance with a resolution of directors, pursuant to section 306(3) (a) of the *Corporations Act 2001*.

On behalf of the directors

Boqing Zhang
Chairman and Chief Executive Officer
31 March 2026

Other Shareholder Information

Distribution of shareholders

As at 31 December 2025, the Company had 278 shareholders and a total of 33,987,282 fully paid ordinary shares on issue. The distribution of shareholders was as follows:

Size of holding	Number of shareholders	Number of ordinary shares	% of issued capital
1 - 1,000	18	8,953	0.03
1,001 – 5,000	86	246,934	0.73
5,001 – 10,000	34	250,824	0.74
10,001 – 100,000	85	3,302,222	9.72
100,001 and over	55	30,178,349	88.79
Total	278	33,987,282	100

Substantial Shareholders

Substantial shareholders as at 31 December 2025 were as follows:

Shareholder	Number of ordinary shares	Percentage (%) of total issued shares
Jacky Boqing Zhang	8,959,621	26.36
Kai, Shen	2,880,905	8.48

Voting Rights

Fully paid ordinary shares in the Company carry voting rights of one vote per share. Unlisted options and unlisted performance rights do not carry voting rights.

Restricted Securities

Due to the suspension of the Company's listing on NSX as a result of the delay in the filing of the audited 2023 financial statements, shares issued during the suspension totalling 5,865,000 were put until escrow and to be released 12 months after the issue date.

Auditor's Independence Declaration under Section 307C of the Corporations Act 2001 to the Directors of Beroni Group Limited

As lead auditor for the audit of Beroni Group Limited for the year ended 31 December 2025, I declare that, to the best of my knowledge and belief, there have been:

- (i) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (ii) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is made in respect of Beroni Group Limited and the entities it controlled during the financial year.

Note 1. Corporate information

The financial statements cover Beroni Group Limited (“Parent entity” or the “Company”) as a consolidated entity consisting of Beroni Group Limited and the entities it controlled (together referred to as the “Group”) at the end of, or during, the year ended 31 December 2025. The financial statements are presented in Australian dollars, which is the Company’s presentation currency, with all values rounded to the nearest dollar unless otherwise stated.

The Company is a for-profit listed public company limited by shares, incorporated and domiciled in Australia. The Company’s shares are publicly traded on the National Stock Exchange of Australia and on the OTCQB (OTC Pink Limited after 2 July 2025) market in the USA.

The Company’s registered office and principal place of business is:

Level 16
175 Pitt Street
Sydney NSW 2000
Australia

The principal activities of the Group during the financial year are the sales of smoking control products (NicoBloc), air purifiers, water filters, cosmetics, healthcare products, stem-cell therapies and viral diagnostic kits and also investing in the research and development of oncology drugs and therapies. It currently has four core businesses – cell therapies, developing new anti-cancer drugs, e-commerce platform for pharmaceutical and healthcare products, and detection & diagnosis of infectious diseases.

The financial statements were authorised for issue, in accordance with a resolution of directors, on 31 March 2026.

Note 2. Basis of preparation

This general purpose financial statement for the annual reporting period ended 31 December 2025 has been prepared in accordance with Australian Accounting Standards (AASB), other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001*. The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

The financial statements also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The financial statements have been prepared on the historical cost basis, except for the revaluation of certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of AASB 2, leasing transactions that are within the scope of AASB 16 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in AASB 102 *Inventories* or value in use in AASB 36 *Impairment of Assets*.

Going Concern

For the year ended 31 December 2025, the Group made a loss after income tax expense of A\$4,460,978 (31 December 2024: loss after income tax expense of A\$10,929,587). The cash balances as at 31 December 2025 was A\$498,656 (31 December 2024: A\$1,754,310). At 31 December 2025 there was a net current assets of A\$332,895 (31 December 2024: net current assets of \$553,993).

The above matters give rise to a material uncertainty that may cast significant doubt over the Group’s ability to continue as a going concern. Therefore, the Group may be unable to realise its assets and discharge its liabilities in the normal course of business at the amounts stated in the financial report.

Note 2. Basis of preparation (continued)

The directors have prepared detailed cash flow projections for the period of 12 months from the signing of this financial report. The Group's ability to fund its operations is dependent upon management's plans and execution, which includes raising additional capital, either through the proposed public offering or private equity, meeting expected sales forecasts, receiving cash from outstanding debtors and future sales, and that if in the event of not raising sufficient funds to meet its current cash flow forecasts, the Group will be able to reduce expenditure accordingly, to be able to pay its debts as and when they fall due.

The Group's financial statements have been prepared on a going-concern basis which contemplates the realisation of assets and satisfaction of liabilities and commitments in the normal course of business. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities should the Group be unable to continue as a going concern.

2.1 Basis of consolidation

The consolidated financial statements comprise the financial statements of Beroni Group Limited and its subsidiaries as at 31 December 2025 and 2024.

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Where shareholding is less than one-half of the voting rights, the Group is considered to have control over the entity when it can exercise power over more than one-half of its voting rights by virtue of an agreement with other shareholders.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of profit or loss and other comprehensive income, statement of financial position and statement of changes in equity of the Group. Losses incurred by the Group are attributed to the non-controlling interest in full, even if that results in a deficit balance.

Where the Group loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Group recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases. Potential voting rights that are currently exercisable or convertible are considered when assessing control.

Consolidated financial statements include all the subsidiaries other than those acquired in business combinations involving entities under common control from the date that control commences until the date that control ceases. The financial statements of subsidiaries are prepared for the same reporting period as the parent, using consistent accounting policies.

All intercompany balances and transactions, including unrealised profits arising from intragroup transactions have been eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred.

2.2 Foreign currency translation

The functional currency of Beroni Group Limited is Australian dollars. The functional currency of the Company's subsidiary, Beroni Hongkong Limited, is Hong Kong dollars and its subsidiary, Tianjin Beroni Biotechnology Co., Limited in mainland China is Chinese Yuan (Renminbi). The functional currency of the other Company's subsidiary in mainland China – Beroni Pharmaceuticals (Guangdong) Co., Ltd - is Chinese Yuan (Renminbi). The functional currency of the Company's subsidiary in Japan - BERONI BIOTECH INC. - is Japanese Yen whilst that of Beroni USA Corporation is United States dollar. The presentation currency is Australian dollars (AUD).

Foreign currency transactions are translated into the functional currency using the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the end of the reporting period.

Foreign exchange gains and losses resulting from settling foreign currency transactions, as well as from restating foreign currency denominated monetary assets and liabilities, are recognised in profit or loss, except when they are deferred in other comprehensive income as qualifying cash flow hedges or where they relate to differences on foreign currency borrowings that provide a hedge against a net investment in a foreign entity.

2.2 Foreign currency translation (continued)

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value was determined.

At the end of the reporting period, the assets and liabilities of the Group are translated into the presentation currency at the closing rate at the end of the reporting period and income and expenses are translated at the weighted average exchange rates for the period. All resulting exchange difference is recognised in other comprehensive income or loss as a separate component of equity (foreign currency translation reserve). On disposal of a foreign entity, the cumulative exchange differences recognised in foreign currency translation reserves relating to that particular foreign operation is recognised in profit or loss.

2.3 Critical accounting judgements and estimates

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal to the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

(a) Impairment of non-financial assets other than goodwill and other indefinite life intangible assets

The Group assesses impairment of intangible assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the Group and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

(b) Goodwill and other indefinite life intangible assets

The Group tests annually, or more frequently if events or changes in circumstances indicate impairment, whether goodwill and other indefinite life intangible assets have suffered any impairment, in accordance with the accounting policy stated in Note 3. The recoverable amounts of cash-generating units are determined based on the higher of value-in-use and fair value less costs of disposal calculations. These calculations require the use of assumptions, including estimated discount rates based on the current cost of capital and growth rates of the estimated future cash flows. Refer to Note 13 for further information.

(c) Fair value measurement related to derivative financial liabilities

The board of directors determines the appropriate valuation techniques and inputs for fair value measurements for derivative financial liabilities. The Group has established a fair value hierarchy that categorises into three levels of inputs to valuation techniques used to measure fair value. In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group considers other observable data (Level 2 inputs) for the asset or liability, either directly or indirectly. If observable data are not available, other valuation techniques (Level 3 inputs) such as an income approach, market approach or net assets value approach are considered.

(d) Estimated provision for credit loss of receivables

The Group recognises a loss allowance for expected credit losses (ECL) on trade and other receivables. The Group recognises lifetime ECL for receivables. The ECL on these financial assets are estimated based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date. Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial asset.

2.3 Critical accounting judgements and estimates (continued)

(e) Revenue from contracts with customers involving sale of goods

When recognising revenue in relation to the sale of goods to customers, the key performance obligation of the Group is considered to be the point of delivery of the goods to the customer, as this is deemed to be the time that the customer obtains control of the promised goods and therefore the benefits of unimpeded access. Judgement is exercised in estimating implicit price concessions which are determined having regard to past experience. Revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised under the contract will not occur when the uncertainty associated with the variable consideration is subsequently resolved. Estimation is involved in the determination of any material financing components attributable to sales transactions arising from explicit or implicit contractual terms.

(f) Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted or modified. The fair value is determined by using the Black-Scholes model and takes into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

(g) Going concern – there are significant assumptions included determining whether the Group is a going concern.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

2.4 Restatement and reclassification changes

Certain prior year comparatives have been reclassified or restated in order to conform to the current year's presentation and to correct some non-material accounting errors subsequently identified. These reclassifications and restatements have no material impact on the overall financial performance of the Group. The net impact on the consolidated statement of profit or loss and other comprehensive income is a debit of \$79,012 which is mainly due to the additional finance and depreciation expenses totalling \$102,112 after new leases were signed and backdated to 2024 subsequent to the year end and the foreign exchange adjustment gain of \$18,167 due to slightly different foreign exchange translation methodology used by the previous consolidation software. The net change to the consolidated statement of financial position was an increase in net assets by \$144,438 mainly due to the offset between some inter-company balances and other liabilities. In addition, there were a few reclassification of balances between trade and other payables, borrowings from related parties, payables to related parties and other liabilities and between other receivables and prepayments but have no impact on the overall financial position.

2.5 New, revised or amended Accounting Standards and Interpretations adopted

New standards, interpretations and amendments adopted

The following amendments are effective or mandatory for the period beginning 1 January 2025:

- Lack of Exchangeability (Amendments to AASB121)
- AASB S2 Climate-related Disclosures (mandatory)
- Effective Date of Amendments to AASB10 and AASB128 (Amendments to Australian Accounting Standards)

For the new standards and amendments, the Group carried out an assessment of its contracts and operations and concluded that the adoption of these standards and amendments have had no effect on the annual consolidated financial statements of the Group.

Any new, revised or amended Accounting Standards or Interpretations that are not yet mandatory have not been adopted early. These standards, amendments or interpretations are not expected to have a material impact on the Group in the current or future reporting periods and on foreseeable future transactions, however management will continue to assess the potential impacts closer to the application dates.

Note 3. Summary of material accounting policies

3.1 Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interest issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

3.1 Business combinations (continued)

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with AASB 12 and AASB 19 respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with AASB 2 at the acquisition date; and
- assets that are classified as held for sale in accordance with AASB 5 are measured in accordance with that standard

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amount of the identifiable assets and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, other contingent consideration is re-measured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

When a business combination is achieved in stages, the Group's previously held interests in the acquired entity are remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

3.2 Goodwill

Goodwill is initially recognised and measured as set out above.

Goodwill is not amortised but is reviewed for impairment as least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash generating units (or groups of cash-generating units) expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.

On the disposal of a cash-generating unit, the attributable amount of goodwill is included in the determination of profit or loss on disposal.

3.3 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances. The company currently generates revenue only from sale of goods and services in China and Japan.

The Company recognises revenue based on the following five steps:

- identify the contract(s) with a customer.
- identify the performance obligations in the contract. Performance obligations are promises in a contract to transfer to a customer goods or services that are distinct.

3.3 Revenue recognition (continued)

- determine the transaction price. The transaction price is the amount of consideration to which an entity expects to be entitled in exchange for transferring promised goods or services to a customer. Where the Group assesses that an implicit price concession exists, revenue is only recognised to the extent it is expected to be received. The difference between the contractual amount and the expected amount is booked as a day 1 credit loss. If the consideration promised in a contract includes a variable amount, an entity must estimate the amount of consideration to which it expects to be entitled in exchange for transferring the promised goods or services to a customer. In addition, for contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year providing significant benefit of financing to the customer, the transaction prices are adjusted for the time value of money based on the expected length of time between when the entity transfers the promised goods or services to the customer and when the customer pays for those goods or services and the prevailing interest rates in the relevant market. The financing benefit is separately recognised as debtor finance.
- allocate the transaction price to each performance obligation on the basis of the relative stand-alone selling prices of each distinct good or service promised in the contract.
- recognise revenue when a performance obligation is satisfied by transferring a promised good or service to a customer (which is when the customer obtains control of that good or service). A performance obligation may be satisfied at a point in time (typically for promises to transfer goods to a customer) or over time (typically for promises to transfer services to a customer). For a performance obligation satisfied over time, an entity would select an appropriate measure of progress to determine how much revenue should be recognised as the performance obligation is satisfied.

Sales of goods and services

In China, the Company sells smoking control products, air purifiers, health supplements, and cosmetics both to the wholesale market and directly to customers through the e-commerce channels.

For sales of goods to the wholesale market, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the wholesaler's specific location (delivery) or when the goods have been collected by the wholesaler directly from the supplier's warehouse. Following delivery, the wholesaler has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when on-selling the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognised by the Group when the goods are delivered to the wholesaler as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due. For sales of goods to retail customers, revenue is recognised when control of the goods has transferred, being at the point the customer purchases the goods on the e-commerce outlet. Payment of the transaction price is due immediately at the point the customer purchases the goods.

Sales of goods on consignment

Revenue from sale of goods on consignment is recognised upon the sale of the goods by the consignee. Control of the goods remains with the Company until such time as the goods are sold by the consignee.

Technical advisory service

The Company provides technical advisory services to other healthcare companies. The services are recognised as a performance obligation satisfied over time and the revenue from providing services is recognised in the accounting period in which the services are rendered. The directors have assessed that the stage of completion determined as the proportion of the total time expected to provide the service that has elapsed at the end of the reporting period is an appropriate measure of progress towards complete satisfaction of these performance obligations. If the services involve performance by another party, then it is accounted for as a separate performance obligation. Payment for these services is not due from the customer until the services are completed by the other party and delivered to the customer.

Discounts, promotional and other rebates

The amount of revenue recognised for a transaction is net of any discounts, promotional and other rebates.

Warranties

Sales-related warranties associated with electrical goods are provided by the product manufacturers and the Company does not bear the related warranty costs.

3.3 Revenue recognition (continued)

Interest

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

3.4 Government subsidy

Government subsidy is not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government subsidy is recognized in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government subsidy is applied for by the Group to local government authorities based on various entitlements the Group is eligible to. Applications for various government subsidies are raised, checked, and approved on an annual basis.

Government subsidy that is receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognized in profit or loss in the period in which they become receivable.

3.5 Cash and cash equivalents

For the purposes of the Statement of Cash Flows, cash and cash equivalents includes cash on hand and at bank, deposits held at call with financial institutions, other short term, highly liquid investments with maturities of three months or less, that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value and bank overdrafts.

Term deposits with maturity over three months include bank deposits with fixed terms over three months' period. For the purpose of the Consolidated Statement of Cash Flows, term deposits with maturity over three months are shown as cash flows from investing activities.

3.6 Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 30 days.

The Group recognises a loss allowance for expected credit losses (ECL) on trade and other receivables. The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition of the financial assets.

The Group recognises lifetime ECL for trade and other receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date. Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial asset. The aging profile of trade and other receivables is disclosed in Note 22.

3.7 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. Cost comprises of direct materials and delivery costs, direct labour, import duties and other taxes, and appropriate proportion of variable and fixed overhead expenditure.

3.8 Property, plant and equipment

Land and buildings are leased for use in the production or supply of goods or services, or for administrative purposes. Leasehold improvements including renovations, furniture and fixtures as part of office fit outs are recognised at cost. These assets are depreciated over the shorter of their useful or the lease term, unless the entity expects to use the assets beyond the lease term.

3.8 Property, plant and equipment (continued)

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is de-recognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Assets are depreciated over their useful lives as follows:

Leasehold Improvements	Lease term
Machinery	7-10 years
Motor vehicles	4 years
Office Equipment	3 years
Other Equipment	5-10 years

3.9 Right-of-use assets

A right-of-use asset is recognised at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the Group expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of-use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The Group has elected not to recognise a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets. Lease payments on these assets are expensed to profit or loss as incurred.

3.10 Lease liabilities

A lease liability is recognised at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the consolidated entity's incremental borrowing rate. Lease payments comprise of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or a rate are expensed in the period in which they are incurred.

Lease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right-of-use asset, or to profit or loss if the carrying amount of the right-of-use asset is fully written down.

3.11 Intangibles

Patents

Patents acquired separately or in a business combination are initially measured at cost, which is its fair value at the date of acquisition. Following initial recognition, it is carried at cost less any amortisation and impairment. The useful life of patents generally ranges from 5 to 20 years and the costs are amortised on a straight-line basis.

3.11 Intangibles (continued)

Software

Costs incurred in developing or acquiring software, licences or systems that will contribute future financial benefits are capitalised. These include external direct costs of materials and service and direct payroll and payroll related costs of employees' time spent on the project. Amortisation is calculated on a straight-line basis over periods generally ranging from 3 to 10 years. IT development costs include only those costs directly attributable to the development phase and are only recognised following completion of technical feasibility, where the Group has the intention and ability to use the asset.

Research and Development

The Group conducts research and development activities to support future development of products, to enhance our existing products and to develop new therapies. All costs associated with these activities are expensed as incurred as uncertainty exists up until the point of regulatory approval as to whether a research and development project will be successful.

Research or development expenditure that relates to a development project acquired separately or in a business combination shall be recognised as an intangible asset when it is probable that the project will be a success considering its commercial and technical feasibility, the Company is able to use or sell the asset, the Company has sufficient resources, and intent to complete the development and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis over the period of their expected benefits.

Recognition and measurement

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful life of the asset. Significant software intangible assets are amortised over a 3 to 10-year useful life. The amortisation period and method is reviewed at each financial year end at a minimum. Intangible assets with indefinite useful lives are not amortised. The useful life of these intangibles is reviewed each reporting period to determine whether indefinite life assessment continues to be supportable.

Impairment of intangible assets

Assets with finite lives are subject to amortisation and are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If there is any indication that these assets have suffered an impairment loss, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Intangible assets that have an indefinite useful life (such as goodwill) are not subject to amortisation and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they may be impaired.

3.12 Investment in equity instruments

Investments in equity instruments and joint ventures that are not held for trading are designated as at FVTOCI (Fair Value Through Other Comprehensive Income) in accordance with IFRS 9 and are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments' revaluation reserve. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included as investment income in the income statement.

3.13 Taxation

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the consolidated statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

3.13 Taxation (continued)

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

3.14 Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

3.15 Trade and other payables

Trade and other payables represent liabilities for goods and services provided to the business prior to the end of the financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months from the reporting date. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

3.16 Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

3.17 Employee benefits

Share-based compensation benefits

Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

Share-based compensation benefits are provided to directors and employees via the Beroni Group Limited's Remuneration Plan. The fair value of share options granted under the Plan are recognised as an employee benefit expense with a corresponding increase in equity (share options reserve). The fair value is measured at grant date and recognised over the period during which the employees become unconditionally entitled to the options. Fair value is determined by an independent valuator using a Black-Scholes option pricing model. In determining fair value, the performance conditions are taken into account ("non-market performance conditions") other than those related to the share price of Beroni Group Limited ("market conditions"). The cumulative expense recognised between grant date and vesting date is adjusted to reflect the directors best estimate of the number of options that will ultimately vest because of internal conditions of the options, such as the employees having to remain with the company until vesting date, or such that employees are required to meet performance conditions such as sales targets and clinical trial advancement. No expense is recognised for options that do not ultimately vest because internal conditions were not met. An expense is still recognised for options that do not ultimately vest because a market condition was not met.

Where the terms of options are modified, the expense continues to be recognised from grant date to vesting date as if the terms had never been changed. In addition, at the date of the modification, a further expense is recognised for any increase in fair value of the transaction as a result of the change.

Where options are cancelled, they are treated as if vesting occurred on cancellation and any unrecognised expenses are taken immediately to profit or loss. However, if new options are substituted for the cancelled options and designated as a replacement on grant date, the combined impact of the cancellation and replacement options are treated as if they were a modification.

3.18 Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the Group's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the Group's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

3.19 Financial instruments

Financial assets

Recognition and de-recognition

Regular purchases and sales of financial assets are recognised on the trade date - the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss is initially recognised at fair value and transaction costs are expensed in the profit or loss. Financial assets are derecognised when rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Classification

Financial assets in the scope of AASB 9 Financial Instruments: Recognition and Measurement are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to maturity investments, or available-for-sale investments, as appropriate.

The Group determines the classification of its financial assets after initial recognition and, when allowed and appropriate, re-evaluates this designation at each financial year-end.

3.19 Financial instruments (continued)

Financial assets of the Group are classified in two categories as follows:

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are measured at fair value through profit or loss. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised or impaired. These are included in current assets, except for those with maturities greater than 12 months after reporting date, which are classified as non-current.

Recognition of expected credit losses

The Group measures the loss allowance at an amount equal to lifetime expected credit losses for loans and receivables. The expected credit losses are measured in a way that reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; the time value of money; and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Financial liabilities

Non-derivative financial liabilities are recognised at amortised cost, comprising original debt less principal payments and amortisation.

3.20 Fair value

Fair values may be used for financial asset and liability measurement and well as for sundry disclosures.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values due to their short-term nature. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

3.21 Issued capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

3.22 Convertible notes and loans

The component parts of the convertible notes and loans issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to share capital. Where the conversion option remains unexercised at the maturity date of the convertible note or loan, the balance recognised in equity will be transferred to retained earnings. No gain or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes or loans are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in carrying amount of the liability component and amortised over the lives of the convertible notes or loans using the effective interest method.

3.22 Convertible notes and loans (continued)

Conversion feature that fails the equity classification due to either the number of shares to be issued varies or the amount of cash to convert into shares varies or both, is considered as a financial liability. It is treated for as a derivative liability and accounted separately from the host instrument. Derivative conversion features which provide the holder with a choice over whether the convertible note or loan is exchanged for shares or cash) or which the Company will issue shares in order to extinguish an obligation, with no cash settlement alternative are accounted for at fair value through profit or loss (FVTPL), separately from the host debt contract.

3.23. Earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of Beroni Group Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

3.23 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Note 4. Group restructure

Beroni Group Ltd was incorporated on 17 June 2016, owning 100% shares of Beroni HongKong Limited ("Beroni Hong Kong") which owns 100% shares of Tianjin Beroni Biotechnology Co., Limited ("Tianjin Beroni"), the company of principal business.

On 21 May 2014, Tianjin Beroni was incorporated as a wholly owned subsidiary of Beijing Benehealth Biotechnology Co. Ltd in Tianjin, the People's Republic of China (the "PRC"). On 8 September 2016, Tianjin Beroni placed 0.99% shares to Eagle IG Limited for a cash consideration of RMB 100,000.

On 9 September 2016, pursuant to a share sale agreement, Beijing Benehealth Biotechnology Co. Ltd and Eagle IG Limited sold the entire share capital of Tianjin Beroni to Beroni Hong Kong for a consideration of RMB 10,010,000. On 24 October 2016, Mr Boqing Zhang, the sole shareholder of Beroni Hong Kong transferred all of his shares in Beroni HongKong to Beroni Group Limited for HKD10,000, which completed the final step of the restructuring process.

When combined with the transactions above, Beroni Hong Kong become the intermediate holding company for the Group. Through this transaction, effective control of Tianjin Beroni passed to the shareholders of the Company. The transaction is not within the scope of *AASB 3 Business Combinations* and has been treated as a capital restructure, where following the corporate restructure of the Group, the Company took control of Tianjin Beroni with no change in underlying control.

In April 2018, the Company acquired 51% of the share capital of Beroni Japan Inc., a company set up for the purpose of developing the Group's business in Japan. The Company has paid a consideration of JPY2.55 million (A\$31,114) for this investment. Beroni Japan was subsequently disposed of on 1 October 2020.

In November 2018, Beroni established a new 100%-owned company in the USA, Beroni USA Corporation to develop the business of detecting and treatment of infectious diseases.

In May 2020, Beroni acquired 100% of the share capital of a new company in Japan, BERONI BIOTECH INC. for the purpose of developing the diagnostic test kit business in Japan.

In December 2020, Beroni acquired control of PENAO Pty Ltd when its shareholding was increased from 40% to 60.71% after a shareholders' restructuring of the Australian company.

Note 4. Group restructure (continued)

In November 2021, Beroni established a new company, Beroni Pharmaceutical (Guangdong) Co., Ltd for its new R&D centre in the Zhuhai National High-Tech Industrial Development Zone in China. Beroni owns 80% of the Chinese company with the other 20% owned by a local investor.

Note 5: Segment information

(a) Description of segments

The Group has been organised into 4 core businesses which are as follows:

1. Cell therapies
2. Developing new anti-cancer drugs
3. e-commerce platform for pharmaceutical and healthcare products
4. Detection & diagnosis of infectious diseases.

The Group is managed primarily on the basis of the nature of these business activities. As the CEO and CFO are the chief operating decision-makers (CODM) who monitor and assess business performance to make resource allocation decisions, they consider the business from both a product and a geographical perspective and has identified the following operating segments for monitoring and reporting:

PENAO (Australia) – developing new anti-cancer drugs

Beroni USA – detection and diagnosis of infectious diseases

Beroni Tianjin (China), Beroni Pharmaceuticals (Guangdong, China) – e-commerce sales of pharmaceutical and healthcare products

Beroni Biotech (Japan) – cell therapies

(b) Segment information provided to the CEO and CFO

	e-commerce sales of pharmaceutical products & services	Developing new anti-cancer drugs	Detection & diagnosis of infectious diseases	Cell therapies	Total

(c) Product categories

The following product categories have been noted for the e-commerce sales of pharmaceutical products & services:

- Nicobloc
- Fogibloc air purifier
- Olansi water filter
- Health supplements
- Cosmetic products
- Viral diagnostic kits
- Cell therapy
- NMN (Nicotinamide Mononucleotide)

Note 5: Segment information (continued)

Product	Product Revenue		Product Gross Profit	
	2025	2024	2025	2024
	AUD	AUD	AUD	AUD
Nicobloc	73,515	322	44,363	272
Health supplements	28,136	155,415	20,048	102,098
Cosmetic products	11,548	22,881	5,396	15,666
Cell therapy	240,423	61,379	240,423	61,379
NMN	162,542	-	47,424	-
All other	122,134	76,819	122,134	42,308
Total for all categories	638,298	316,816	479,788	221,723

Geographical information

Product revenue based on the geographical location of customers is as below:

Sales Revenue by Geographical Market

	2025	2024
	AUD	AUD
China	475,756	316,816
Japan	162,542	-
	638,298	316,816

Major customers

The major customers accounting for more than 10% of the sales of the Group are as follows:

	2025	2024
	AUD	AUD
China Business Beroni (Tianjin) Technology Co., Ltd	26,079	148,541
Dongfang Tianyu (Tianjin) Health Management Co., Ltd	-	76,011
Baishun (Guangdong) Health Management Co., Ltd	-	61,387
Pandora (Japan) Co., Ltd	94,143	-
	120,222	285,939

Note 6. Revenue

The Group derives its revenue from contracts with customers for the transfer of goods and services over time and at a point in time:

Revenue by timing of revenue	Consolidated	Consolidated
	2025	2024
	AUD	AUD
Goods transferred at a point in time	397,875	255,437
Services transferred over time	240,423	61,379
	638,298	316,816

Note 7. Other Income

	Consolidated	Consolidated
	2025	2023
	AUD	AUD
Government subsidy and other income	83,333	268,466
	83,333	268,466

The government subsidy in 2025 mainly represents the \$71,983 R&D tax rebate (2024: \$152,943) received or receivable from the Australian government to support the PENAO drug research in Australia.

Note 8. Expenses

Loss before income tax is derived at after taking the following significant expense items into account:

	Consolidated	Consolidated
	2025	2024
	AUD	AUD
Wages and salaries	714,063	1,055,426
Superannuation	22,347	71,914
Directors' fees	502,011	577,222
Accounting and audit fees	267,574	270,895
Insurance	102,452	117,496
Rent expenses	96,058	118,422
R&D expenses	173,903	307,015
Legal fees	2,091	92,439
Listing expenses	76,515	143,423
Depreciation and amortization	193,575	552,703
Share-based compensation benefits ¹	1,999,189	8,020,533
All other expenses	796,319	886,244
	4,946,097	12,213,732

¹ Share-based compensation benefits represent the cost of the new shares issued to directors and senior employees during the year and the allocated cost or cost reversal of the stock options granted to directors and employees in July 2021 and modified in May 2022. Refer to Note 23.

Note 9. Cash and cash equivalents

	Consolidated	Consolidated
	2025	2024
	AUD	AUD
Cash on hand	1,011	1,560
Cash at bank	497,645	1,752,750
Total cash and cash equivalents	498,656	1,754,310

Note 10. Trade and other receivables

	Consolidated 2025 AUD	Consolidated 2024 AUD
Amounts due from customers	1,753,910	1,613,076
Less: Provision for expected credit losses ¹	(1,622,342)	(1,439,036)
Trade receivables	<u>131,568</u>	<u>174,040</u>
Others	408,668	458,537
Less: Provision for expected credit loss	(289,234)	(317,579)
Other receivables	<u>119,434</u>	<u>140,958</u>

Movements on the provision for the impairment of trade and other receivables are as follows:

	Consolidated 2025 AUD	Consolidated 2024 AUD
At 1 January	1,756,615	2,690,412
Decrease in provision for expected credit losses due to write-offs (Decease) / Increase in provision for expected credit losses ¹	-	-
Write off of receivable from Youtokukai Fund	-	(24,815)
Exchange differences	-	(1,224,868)
	154,961	315,886
At 31 December	<u>1,911,576</u>	<u>1,756,615</u>

¹Being (decrease) / increase in expected credit losses based on trade receivables aging at end of the financial year.

Note 11. Prepayments and other current assets

	Consolidated 2025 AUD	Consolidated 2024 AUD
Other prepayments and current assets	1,053,825	1,041,738
Provision for expected credit losses	(127,905)	(124,268)
	<u>925,920</u>	<u>917,470</u>

Movements on the provision for the impairment of prepayments and other current assets are as follows:

	Consolidated 2025 AUD	Consolidated 2024 AUD
At 1 January	124,268	3,739,150
(Decease) / Increase in provision for expected credit losses	-	-
Write off of prepaid shares issued to Medicine Plus ¹	-	(3,618,825)
Exchange difference	3,637	3,943
At 31 December	<u>127,905</u>	<u>124,268</u>

¹ On 8 October 2018, Beroni issued 2,067,900 shares at \$1.75 to the owners of Medicine Plus as partial settlement for the acquisition of the latter company. The original settlement price of \$14.3 million agreed in June 2018 was increased by 10% to approximately \$15.8 million in October 2018 as a result of the owners of Medicine Plus agreeing to extend the settlement date. However, due to the long delay in the settlement, management has decided to recognise the cost of the shares as an expense in the income statement. In the event that the acquisition can be completed, the shares expense will be reversed accordingly. In April 2024, the directors of Beroni decided to write off this prepayment from its books. Another amount of \$56,833 prepaid to an ex-subsiary company was also written off.

Note 12. Inventories

	Consolidated 2025 AUD	Consolidated 2024 AUD

The intangible assets are amortised on a straight-line basis over their useful lives as follows:

	<u>Useful life</u>	<u>Remaining useful life</u>
PENAO patents	14 years until patent expiry in 2037	Not amortised yet (as asset not yet ready for use)
BCI patent	20 years	13 years upon first expiry date
Capitalised development costs	20 years	16 years
Other patents	20 years	11-17 years
Software	3-10 years	-

Note 13. Intangible assets (continued)

The amortisation charges for 2024 and 2023 are included within the amortisation and depreciation balances in Note 8.

PENAO patent

Impairment testing

The Group tests intangible assets not yet ready for use annually for impairment, or more frequently if there are indications that intangible assets not yet ready for use might be impaired. For the purpose of the impairment testing, the intangible assets not yet ready for use are the patents owned by the Cash Generating Unit (“CGU”) – PENAO Pty Ltd, an Australian company set up to develop the new cancer drug, PENAO. The PENAO patent asset consists of a number of registered patents and related intellectual property in relation to the anti-cancer drug PENAO, currently in development. The drug has successfully completed Phase 1 trial as at balance sheet date.

The recoverable amount of the patent owned by the PENAO company was based on the fair value of the commercialisation of the cancer drug upon successful completion of the clinical trials, estimated using discounted cash flows. The fair value measurement was categorised as a Level 3 fair value based on the inputs in the valuation technique used.

In previous years, Beroni has engaged Leadenhall Valuation services Pty Ltd (“Leadenhall”) to determine the fair market value of PENAO for impairment testing purposes. The last valuation of PENAO prepared by Leadenhall was as at 31 December 2024. Beroni has determined the fair market value of PENAO as at 31 December 2025 based on the Leadenhall 31 December 2024 valuation. Beroni has engaged Leadenhall to perform a review of Beroni’s own valuation. Leadenhall did not identify anything that they consider to be materially unreasonable and accordingly, consider Beroni’s own valuation to be appropriate for the purposes of impairment testing. Based on the management review, the Group concluded that the estimated recoverable amount far exceeds the carrying amount and no impairment is required.

The recoverable value methodology used is the fair value less cost to dispose based on discount cash flow projections over 24 years (2023: 24 years). The fair value hierarchy is Level 3. The key assumptions used in the estimation of the fair value are set out below.

Key assumptions	Valuation inputs
Growth rate	Not meaningful, currently pre-revenue
Discount rate	15% (2024: 15%)
Lifetime revenue (US\$)	\$20.49 billion (2024: \$22.66 billion)
Gross margin	59% pre patent expiry, 40% post patent expiry (2024: 59%)
Selling, general & administrative expenses (%)	27 % of revenue (2024: 27%)
Estimated R&D costs (US\$)	\$90 million (based on the estimated average cash spent on R&D per successful drug (2019 prices) based on several studies published by PharmacoEconomics Journal) (2024: \$655 million)
Probability of success	10% (2024: 10.8%)
Basis for assumptions	Primarily market-based information as the asset is currently in an early stage of development

Note 13. Intangible assets (continued)

Contractual commitments

See Note 32 for contractual commitments related to PENAO.

Brain Computer Interface (BCI) patent

The Group acquired the BCI patent in February 2025 from a Japan-based scientist. The patent has been registered in Japan, China and the USA. The brain wave extraction patent enables high-resolution electroencephalography (EEG) signal acquisition equivalent to 64 channels using only 8 electrodes. This innovation addresses longstanding challenges in EEG device complexity, cost, and portability, with direct implications for clinical diagnostics, neurotechnology, brain-computer interfaces and consumer electronics.

The recoverable amount of the BCI patent was based on the fair value of the commercialisation of the device upon successful production and testing, estimated using discounted cash flows. The fair value measurement was categorised as a Level 3 fair value based on the inputs in the valuation technique used. The Group engaged an independent business valuation expert, Leadenhall, to determine the fair value of the BCI patents in 2025. The Leadenhall review concluded that the estimated recoverable amount exceeds the carrying amount and no impairment is required.

The recoverable value methodology used is the fair value less cost to dispose based on discount cash flow projections from 2027 to 2039 (upon the first expiry date of the patent). The fair value hierarchy is Level 3. The key assumptions used in the estimation of the fair value are set out below.

Key assumptions	Valuation inputs
Growth rate	12%
Discount rate	20.5% - 22.0%
Lifetime revenue (US\$)	\$461.50 million
Gross margin	60%
Selling, general & administrative expenses (%)	27% of revenue
Estimated R&D costs (US\$)	6% of revenue
Probability of success	N/A
Basis for assumptions	Primarily market-based information as the asset is currently in a pre-commercialization stage

Capitalised development costs

The Company has entered into an agreement with the Columbia University, New York to provide US\$1 million funding to a 12-month research program in the field of ArboViroPlex rRT-PCR Test, a multiplex assay that can simultaneously test for Zika virus, all dengue virus serotypes, Chikungunya virus and West Nile virus, under the direction of Professor Walter Ian Lipkin. In return for the research funding support, Columbia University grants the Company an exclusive option to obtain an exclusive, compensation bearing license in the territory of China to the ArboViroPlex rRT-PCR Test patents and inventions and also a non-exclusive, compensation bearing license in the territory of China to the information and materials developed in the course of this research. In April 2019, the Company signed a 20-year exclusive license agreement with the Columbia University to sell the diagnostic kit product on a worldwide basis. The US\$1 million funding provided for the product development is capitalised and amortised over the 20-year life of the license.

Note 13. Intangible assets (continued)

Other patents

Columbia University has secured the ArboViroPlex rRT-PCR Test patent in three countries namely USA, India, and China. The patents were paid for by Beroni and the carrying amount of the patents which represents the registration costs of the patent in these countries will be amortised over the 20-year life of the license.

In previous years, Beroni has engaged Leadenhall Valuation services Pty Ltd ("Leadenhall") to determine the fair market value of the capitalised development cost and related patents for impairment testing purposes. The last valuation of this intangible asset was prepared by Leadenhall as at 31 December 2024. Beroni has determined the fair market value of this intangible asset as at 31 December 2025 based on the Leadenhall 31 December 2024 valuation. Beroni has engaged Leadenhall to perform a review of its own valuation. Leadenhall did not identify anything that they consider to be materially unreasonable and accordingly, considered Beroni's own valuation to be appropriate for the purposes of impairment testing. Based on Beroni's own review, the Company concluded that the estimated recoverable amount far exceeds the carrying amount and no impairment is required.

The recoverable value methodology used is the fair value less cost to dispose based on discount cash flow projections over 14 years. The fair value hierarchy is Level 3. The key assumptions used in the estimation of the fair value are set out below.

Capitalised development costs and related patents

Key assumptions	Valuation inputs
Growth rate	Not meaningful, currently pre-revenue
Discount rate	21.75% (2024: 21.75%)
Lifetime revenue (US\$)	\$ 227.99 million (2024: \$212.50 million)
Gross margin	60% - 65% from 2027 to 2038; 55% from 2039 to 2046 (2024: 60% - 65% from 2025 to 2035; 55% - 60% from 2036 to 2045)
Selling, general & administrative expenses (%)	40% (2024: 30%-35% of revenue)
Estimated R&D costs (US\$)	10% of revenue (2024: \$10 million)
Probability of success	N/A
Basis for assumptions	Primarily market based information as the asset is currently in a pre-commercialization stage

Note 15. Leases

This note provides information for leases where the Group is a lessee. The Group leases various offices and the rental contracts are typically made for fixed periods of one to five years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Lease assets may not be used as security for borrowing purposes.

Assets and liabilities arising from a lease are initially measured on a present value basis.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Note 15. Leases (continued)

The right-of-use assets are depreciated on a straight line over the shorter of the assets' useful life and the unexpired period of the lease term which ranges from one to five years.

Lease liabilities include the net present value of the following lease payments:

- fixed payments less any lease incentive receivables
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date
- amounts expected to be payable by the Group under residual value guarantees
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

The interest rate implicit in the lease is not readily determinable. The Company's incremental borrowing rate is defined as the rate of interest that it would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. When the lease is denominated in a foreign currency, the Company's incremental borrowing rate should be the rate at which the lessee could obtain funding for the asset in the foreign currency.

Lease liabilities recognized as at 31 December 2025:

	Consolidated 2025 AUD	Consolidated 2024 AUD
Current lease liabilities	222,040	160,272
Non-current lease liabilities	66,338	249,442
	288,378	409,714

The recognised right-of-use assets relate to the following types of assets:

Properties	Consolidated 2025 AUD	Consolidated 2024 AUD
Cost	406,094	395,986
Accumulated depreciation	(277,493)	(192,538)
Carrying amount	128,601	203,448

Additions to the right-of-use assets during 2025 were \$NIL (2024: \$NIL).

Amounts recognised in profit and loss	Consolidated 2025 AUD	Consolidated 2024 AUD
Depreciation expense on right-of-use assets	37,306	222,022
Interest expense on lease liabilities	49,275	41,060
	86,581	263,082

	Consolidated 2025 AUD	Consolidated 2024 AUD
Expenses relating to short-term leases (included in administrative expenses)	8,881	41,014
Expense relating to leases of low-value assets that are not shown above as short-term leases (included in administrative expenses)	4,542	4,377

The total cash outflow for leases in 2025 was \$215,095 (2024: \$59,597).

Difference in overseas tax rates – current year	(34,615)	(92,157)
Income tax expense / (benefit)	742	721

Note 16. Income tax (continued)

The applicable tax rate used reconciling income tax expense on continuing operations is the Australian enacted corporate tax rate of 30% (2024: 30%). This rate was selected due to the significant management presence and intellectual property located in Australia. The actual rate of tax applicable in particular jurisdictions may be higher or lower than 30%.

The enacted corporate tax rates across all jurisdictions are as follows:

- Australia 30%
- Japan 15%
- USA 21%
- China 25%
- Hong Kong 16.5%

Unused tax losses below are disclosed showing a lower tax rate in Australia, as this is the expected tax rate that will apply to the Australian entities at the time when they are able to utilise those losses, based on current enacted corporate tax rates in Australia.

	2025	2024
	AUD	AUD
(c) Tax losses		
Breakdown of unused tax losses not recognised by jurisdiction		
Unused Australian tax losses for which no deferred tax asset has been recognised	12,073,687	11,289,022

Note 17. Trade and other payables

	Consolidated 2025 AUD	Consolidated 2024 AUD
Current Liabilities		
Trade and other payables	6,281	8,266
Payable to related parties ¹	914,038	907,487
Other liabilities ¹	281,448	750,793
	1,201,767	1,666,546
Non-current Liabilities		
Borrowings from related party ²	1,582,682	581,561
	1,582,682	581,561

¹ Payable to related parties represents accrued directors' and secretary's fees.

² See Note 23.

Note 18. Earnings per share

	Consolidated 2025 AUD	Consolidated 2024 AUD
Basic loss per share (cents)	(13.38)	(45.85)
Diluted loss per share (cents)	(13.38)	(45.85)

The calculation of the basic and diluted earnings per share is based on the following data:

	Consolidated 2025 AUD	Consolidated 2024 AUD
Earnings		
Earnings for the purpose of basic earnings per share being net loss attributable to owners of the Company	(4,223,387)	(10,667,392)
Earnings for the purpose of diluted earnings per share	(4,223,387)	(10,667,392)

Number of shares

Weighted average number of shares used in calculating basic earnings per share ***	31,564,759	23,267,180
Weighted average number of shares used in calculating diluted earnings per share ****	31,564,759	23,267,180

Note 18. Earnings per share (continued)

**** At 31 December 2025, 25,736 of US\$100 convertible notes (20,736 with a conversion price of US\$6.912 were excluded from the diluted weighted-average number of ordinary shares calculation because their effect would have been anti-dilutive. If the 20,736 notes were to be converted at US\$6.912, the number of shares issued would be 300,000. At 31 December 2024, 5,323,750 options, 25,736 of US\$100 convertible notes (20,736 with a conversion price of US\$6.912 and 5,000 with a conversion price of the lower of US\$28 and the initial public offering price on Nasdaq or New York Stock Exchange were excluded from the diluted weighted-average number of ordinary shares calculation because their effect would have been anti-dilutive. If the 20,736 notes were to be converted at US\$6.912 and the 5,000 notes converted at US\$28, the number of shares issued would be 317,858. As the vesting of the options depends on certain milestones being achieved, there is no certainty that the options will be exercised upon vesting or which milestones will be met and the number of shares to be issued cannot be determined.

Note 20. Financial assets and financial liabilities (continued)

Financial instruments not measured at fair value

Financial instruments not measured at fair value includes cash and cash equivalents, trade and other receivables, trade and other payables, loans and borrowings, and payables to related parties. Due to their short-term nature, the carrying value of cash and cash equivalents, trade and other receivables, trade and other payables and payables to related parties approximates their fair value.

Financial instruments measured at fair value

Convertible notes and loans

	Consolidated 2025 AUD	Consolidated 2024 AUD
Balance at beginning of the period	805,000	4,190,517
Convertible notes and loans issued, net of transaction costs	-	-

² This represents the intrinsic value of the separated conversion components at the time of the conversion to equity.

Note 21. Financial risk management

General objectives, policies and processes

Activities undertaken by the Group may expose the Group to market risk (including currency risk and interest rate risk), credit risk and liquidity risk. The Board has overall responsibility for the determination of the Group's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority to its finance team, for designing and operating processes that ensure the effective implementation of the objectives and policies of the Group. The Group's risk management policies and objectives are therefore designed to minimise the potential impacts of these risks on the results of the Group where such impacts may be material. The Board receives regular reports from the Group Financial Controller through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Group's competitiveness and flexibility.

(a) Credit risk

Credit risk is the risk that the other party to a financial instrument will fail to discharge their obligation resulting in the Group incurring a financial loss. This usually occurs when debtors or counterparties to derivative contracts fail to settle their obligations owing to the Group.

Receivable balances are monitored on an ongoing basis. To mitigate the credit risk associated with cash and cash equivalents, contracts are taken out only with reputable financial institutions.

The maximum exposure to credit risk at the end of the reporting period in relation to each class of financial asset is the carrying amount of those assets, which is net of impairment losses. Refer to the summary of financial instruments table above for the total carrying amounts of financial assets.

The main source of credit risk to the Group is considered to relate to the class of assets described as trade and other receivables. Trade and other receivables that are neither past due or impaired are considered to be of high credit quality. Aggregates of such amounts are detailed in Note 10. No collateral is held over other receivables.

Trade and other receivables

The Group measures expected credit losses using a lifetime expected loss allowance for trade and other receivables. To measure the expected credit losses, trade and other receivables have been grouped based on shared credit risk characteristics and the days past due. The expected loss rates are based on the payment profiles of sales over a period of 24 months and the corresponding historical credit losses experienced within this period.

Trade and other receivables are written off where there is no reasonable expectation of recovery.

Impairment losses on trade and other receivables are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

Note 21. Financial risk management (continued)

Impairment

The balance of trade and other receivables that were impaired at 31 December 2025 is \$1,911,578 (2024: \$1,856,615).

31 December 2025	Not past due	Less than 6 months	6-12 months	More than 1 year	Total
	AUD	AUD	AUD	AUD	AUD
Expected credit loss %	-	0%	0%	100%	88.39%
Gross carrying amount	-	148,842	62,737	1,950,998	2,162,577
Expected credit loss provision	-	0	0	1,911,578	1,911,578

31 December 2024	Not past due	Less than 6 months	6-12 months	More than 1 year	Total
	AUD	AUD	AUD	AUD	AUD
Expected credit loss %	-	0%	93.93%	98.42%	90.17%
Gross carrying amount	-	168,124	95,845	1,794,948	2,058,918
Expected credit loss provision	-	-	90,031	1,766,584	1,856,615

The aging of the trade and other receivables that were not impaired as at 31 December 2024 are set out in the following table.

	2025 AUD	2024 AUD
Neither past due nor impaired	-	-
0 to 180 days past due but not impaired	148,842	168,124
180 to 360 days past due but not impaired	62,737	5,814
Over 360 days past due but not impaired	39,420	28,364
	250,999	202,303

The main source of credit risk to the Group is considered to relate to the class of assets described as trade and other receivables. Trade and other receivables that are neither past due or impaired are considered to be of high credit quality. Aggregates of such amounts are detailed in Note 10. No collateral is held over other receivables.

Cash and cash equivalents

The Group held cash and cash equivalents of \$498,656 (2024: \$1,754,310) as at 31 December 2025. The cash and cash equivalents are held with bank and financial institution counterparties, which are rated AA- to AA+, based on rating agency Standard and Poor's ratings.

(b) Liquidity risk

Liquidity risk is the risk that the Group may encounter difficulties raising funds to meet commitments associated with financial instruments, e.g. borrowing repayments.

Prudent liquidity risk management implies maintaining sufficient cash to meet its financial commitments. The Group manages liquidity risk by continuously monitoring forecasted and actual cash flows and matching the maturity profiles of financial assets and liabilities.

Note 21. Financial risk management (continued)

Maturity analysis

Contractual maturities of financial liabilities	Less than 6 months	6-12 months	Between 1 and 2 years	Total contractual cash flows	Carrying amount
	AUD	AUD	AUD	AUD	AUD
At 31 December 2025

	<u>68,114</u>	<u>2,435,577</u>	<u>959,129</u>	<u>3,472,772</u>	<u>3,462,820</u>

(c) Market risk

Market risk arises from the use of interest bearing, and foreign currency financial instruments. It is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates (interest rate risk) or foreign exchange rates (currency risk).

Interest rate risk

Some cash balances held by the Group are subject to interest, however the movement of interest rates have an immaterial impact on the Group's results. Interest expenses are largely non-cash and / or fixed at inception relating to the convertible notes and loans.

Foreign exchange risk

The operational foreign exchange risk is managed as follows:

Each controlled entity manages the volatility arising from changes in foreign exchange rates by matching liabilities with assets of the same currency, as far as is practicable, thus ensuring that any exposures to foreign currencies are minimised. The Group's aim is to mitigate, where possible, its operational foreign currency exposures at a controlled entity level.

The Australian entity is subject to the following foreign currency exposures at each year end. The analysis below demonstrates the impact on profit or loss after income tax of a 10% strengthening or weakening of the foreign exchange rates based on items on balance sheet at the end of the year.

Note 21. Financial risk management (continued)

	31 December 2025			31 December 2024		
	Balance in AUD	Sensitivity	Profit or Loss Change	Balance in AUD	Sensitivity	Profit or Loss Change
USD – Cash	52,114	10%	5,211	518,451	10%	51,845
USD - Convertible Notes and Loans	-	-	-	805,000	10%	80,500
USD – Derivative Financial Liabilities	-	-	-	0	0	0

The Group is exposed to currency risk in relation to the translation of the ultimate parent entity's net investments in foreign operations to its functional currency of Australian dollars. This translation is recognised directly in other comprehensive income or foreign currency translation reserve. For foreign currency receivables or payables where settlement is likely to occur in the foreseeable future, they do not form part of the Group's net investment in that foreign operations and the exchange difference arising on translation of these balances is recognised in profit or loss.

The sensitivity analysis below demonstrates the impact on foreign currency translation reserve (FCTR) of a 10% strengthening or weakening against the AUD dollar of the major currencies to which the Group is exposed through its net investments in foreign operations. The net investment in a foreign operation represents the Group's interest in the net assets of that foreign entity and may include long-term receivables or loans where settlement is not planned or likely to occur in the foreseeable future. The analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases. The basis for the sensitivity calculation is the Group's actual residual exposure at the balance date.

31 December 2025

<u>Exposure Currency</u>	<u>Balance in AUD</u>	<u>Sensitivity</u>	<u>FCTR Change</u>	<u>Sensitivity</u>	<u>FCTR Change</u>
			<u>Gain / (loss)</u>		<u>Gain / (loss)</u>
Chinese Yuan	7,863,764	10%	854,997	10%	(1,028,720)
Japanese Yen	(65,959)	10%	11,922	10%	(11,258)
US Dollar	(56,455)	10%	(5,197)	10%	6,352
Hong Kong Dollar	(16,710,913)	10%	(694,218)	10%	848,488

31 December 2024

<u>Exposure Currency</u>	<u>Balance in AUD</u>	<u>Sensitivity</u>	<u>FCTR Change</u>	<u>Sensitivity</u>	<u>FCTR Change</u>
			<u>Gain / (loss)</u>		<u>Gain / (loss)</u>
Chinese Yuan	8,564,748	+10%	1,140,878	-10%	(901,890)
Japanese Yen	(47,214)	+10%	20,524	-10%	(16,693)
US Dollar	(56,455)	+10%	(2,490)	-10%	3,445
Hong Kong Dollar	(15,670,534)	+10%	(625,542)	-10%	591,022

As the inter-company balance between Beroni Biotech and the parent company represents short-term borrowing and is likely to be settled in the foreseeable future, the exchange difference arising on translation of the balance is recognised in profit or loss. The analysis below demonstrates the impact on profit or loss of a 10% strengthening or weakening against the AUD dollar of the Japanese Yen to which the Group is exposed through its inter-company balance with the Japanese subsidiary.

Note 21. Financial risk management (continued)

<u>Exposure Currency</u>	<u>Balance in AUD</u>	<u>Sensitivity</u>	<u>Profit or (Loss) Change</u>	<u>Sensitivity</u>	<u>Profit or (Loss) Change</u>
<u>31 December 2025</u>					
Japanese Yen	542,283	+10%	16,181	-10%	(19,777)

Note 22: Share-based compensation benefits

	2025	2024
	AUD	AUD
Share-based compensation benefits recognised during the financial year		
Shares issued to directors and employees ¹	5,611,200	10,504,600
Options issued to directors and employees ²	(3,612,011)	(2,568,867)
	<u>1,999,189</u>	<u>7,935,733</u>

Beroni Group Limited has established a Remuneration Plan for its directors and employees. The Remuneration Plan provides flexibility to the Board to grant share options to directors and employees. The definition of employee under the Plan Rules includes any full time or permanent part-time employee or officer or director of the Company or any related body corporate of the Company.

The executive and non-executive directors received a proportion of their remuneration in the form of shares or options for shares issued by the Company.

¹ Shares issued to directors and employees

In June 2025, the Company issued 5,010,000 new shares at A\$1.12 per share to its directors and senior employees as a reward for their performance in the past financial year. A total of 2,450,000 shares were issued to the directors as follows:

Name	Number of shares issued	Total number of shares held at 31 December 2025
Jacky Boqing Zhang	2,100,000	8,959,621
Hai Huang	200,000	960,442
Peter Yap Ting Wong	-	767,500
Libing Guo	150,000	1,400,560
Dr. Richard Buchta	-	93,750
Nicholas Ong	-	191,214
Total	<u>2,450,000</u>	<u>12,373,087</u>

These shares immediately vested on issuance and are valued based on a level 3 fair value estimate consistent with that used for valuing derivative financial liabilities. The primary determinate of this value is the fair value of the Group's intangible assets.

Note 22: Share-based compensation benefits (continued)

² Options issued to directors and employees

Beroni Group Limited has established a Remuneration Plan for its Directors and Employees. The Remuneration Plan provides flexibility to the Board to grant share options to Directors and Employees. The definition of employee under the Plan Rules includes any full time or permanent part time employee or officer or director of the Company or any related body corporate of the Company. In total, 13,250,000 options and 9,255,000 options pre consolidation (or 3,312,500 options and 2,133,750 options post consolidation) have been issued to the directors and employees respectively in 2021 and 2022. As none of the vesting conditions were met before the options' vesting expiry date on 30 June 2025, the total cost apportioned of \$3,612,010 in the previous financial years was reversed and credited to profit or loss.

The number of stock options previously held by the directors were as follows:

Director	No. of Stock Options Held 31 December 2025	No. of Stock Options Held 31 December 2024
Boqing ZHANG	0	1,500,000
Hai HUANG	0	375,000
Peter Yap Ting WONG	0	750,000
Libing GUO	0	237,500
Nicholas ONG	0	150,000
Richard BUCHTA	0	150,000
Directors	0	3,312,500
Senior employees	0	2,133,750
Total directors and senior employees	0	5,446,250

Note 23. Related party transactions

¹ Included in the short-term benefits is tuition fees of \$56,119 (2024: \$57,322) paid to the CEO for his PhD study. The Company has also prepaid a further \$60,235 for his study which will be completed at the end of January 2027 and recognised over that period accordingly.

Other transactions

In the year ended 31 December 2025, the Company has engaged the services of Asia Invest Partners Limited to manage its financial and tax affairs in Australia. Asia Invest Partners is owned by the Australian director, Peter Yap Ting Wong. The Company has paid a total of \$49,273 (excluding GST) for such services rendered in the 2025 financial year (2024: \$37,300 excluding GST). The balance outstanding at the end of the year is \$2,837 (FY2024: \$5,500). Asia Invest Partners also jointly share the Sydney office with Beroni Group. The share of rental paid by Beroni Group in 2025 is \$8,881 (2024: \$9,756).

c) Loans from key management personnel

	2025	2024
	AUD	AUD

End of the year	<u>1,582,682</u>	<u>581,561</u>

¹ In September 2024, the CEO Mr. Boqing Zhang provided a loan of AUD202,041 to the the Australian holding company, Beroni Group Limited for working capital needs. The loan is unsecured, repayable on 18 September 2025 and carries interest at 5% per annum. Also in 2024, he provided a loan of CNY1.3 million (AUD269,369) to Beroni Tianjin which is unsecured, interest free and has no repayment date. In 2025, Mr. Boqing Zhang lent a further \$1,131,510 to the Group.

Note 24. Dividends

There was no dividend paid nor declared during the period.

Note 25. Share capital

Note 25. Share capital (continued)

¹ Ordinary shares entitle the holder to participate in dividends, and to share in the proceeds of winding up the Company in proportion to the number of and amounts paid on the shares held. Ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

² On 16 October 2023, the Company announced its decision to consolidate the share capital on a 4:1 basis. At the time of the announcement, the Company had 80,053,372 shares on issue. The Consolidation applied equally to all shareholders and individual shareholdings were reduced in the same ratio as the total number of shares. Accordingly, the share consolidation has no material effect on the percentage interest of each individual shareholder. All other equity securities of the Company were adjusted accordingly. The consolidation was completed on 24 November 2023 and the Company has 20,013,441 shares on issue after the consolidation.

Note 26. Convertible notes – equity

	Consolidated 2025 AUD	Consolidated 2024 AUD
Convertible notes - equity	3,010,038	3,010,038

In May 2020, 20,736 0% USD denominated convertible notes were issued by the Company to an investor at an issue price of \$100 per note. Each note entitles the holder to convert to a fixed number of shares by dividing the face value of the note by the conversion price of US\$1.728 per share. (After the share consolidation in November 2023, the conversion price for these convertible notes has been changed to US\$6.912 per share). Conversion may occur at any time between the date of issue and the maturity date. The maturity date was initially set at May 2021 but was later extended to May 2022. The net proceeds received from the issue of these convertible notes were initially recognised in liability in 2020 and 2021 as the investor could redeem the convertible notes upon maturity.

However, on 16 May 2022, the investor agreed to extend the maturity date of the convertible notes to the official date of listing of the Company on the Nasdaq stock market and to convert all unconverted notes to ordinary shares upon maturity. As the convertible notes can no longer be redeemed for cash before or upon maturity, they were fully recognised as equity in 2022.

Note 27. Reserves

	Consolidated 2025 AUD	Consolidated 2024 AUD
Surplus reserve ¹	16,885	16,886
Foreign currency translation reserve ²	836,386	519,644
Shares options reserve ³	-	3,612,011
Total Reserves	853,271	4,148,541

¹ Surplus reserve is to recognise accumulation of surplus funds available for future use.

² Foreign currency translation reserve represents exchange differences arising on translation of the foreign controlled entity are recognised in other comprehensive income as described in Note 2.2 and accumulated in a separate reserve within equity. The cumulative amount is reclassified to profit or loss when the net investment is disposed of.

³ The share options reserve is used to recognise the grant date fair value of options issued to employees but not yet vested or exercised.

Note 28. Non-controlling interests

	Consolidated 2025 AUD	Consolidated 2024 AUD
Non-controlling interests	(328,360)	(106,016)

The non-controlling interests represent the other 39.29% ownership interest in PENAO Pty Ltd and the other 20% in Beroni Pharmaceuticals (Guangdong) Co., Ltd which were recognised upon acquisition of control and incorporation of the company respectively.

Note 29. Parent entity

The following information relates to the parent entity Beroni Group Limited. The information presented has been prepared using accounting policies that are consistent with those presented in Note 3.

	2025	2024

Increase in other liabilities	(517,069)	373,460
Net cash flow used in operating activities	(2,260,157)	(3,001,751)

Note 32. Contingencies

The Group has no contingent liabilities or commitments as at 31 December 2025 except for the followings:

(a) PENAO Pty Ltd

Convertible notes

In July 2019, Beroni signed a shareholder agreement to acquire 40% of the total share capital of PENAO Pty Ltd with NewSouth Innovations Pty Limited (NSI) owning the other 60%. NSI is the subsidiary arm of the University of New South Wales. PENAO Pty Ltd is a company recently set up to take over from Cystemix Pty Ltd the development of the anti-cancer drug called PENAO for treatment of cancer tumours. PENAO Pty Ltd will take over the licensing rights to the new drug. In December 2020, Beroni and NSI agreed to vary the original shareholding agreement whereby through the issuance of shares and convertible notes, Beroni and NSI owns 60% and 40% respectively of the share capital of PENAO Pty Ltd. Under the shareholding variation agreement, when new shares are issued to Beroni and NSI upon additional payments from the former, convertible notes will also be issued to NSI which will automatically be converted to shares upon the occurrence of key milestone events as detailed below:

- NDA China: acceptance of a PENAO New Drug Application in China;
- TGA Australia: TGA approval of PENAO's product for commercial sale in Australia;
- IPO: the date that is 90 days prior to the completion of an initial public offering (IPO) and listing of PENAO Shares in Australia or overseas stock exchange;
- Share sale: the date that is 90 days prior to the sale of all issued Shares in PENAO;
- Asset sale: the sale of all or substantively all of PENAO's assets.

At the end of 2023, NSI have been issued convertible notes which are convertible into 200,385 ordinary shares. Upon the occurrence of any of the above events and the automatic conversion into shares, NSI will increase its ownership from 39.29% to 60.71%. On the other hand, NSI and the creator shareholders have granted Beroni an option to purchase such number of the Shares held by NSI and the creator shareholders (on a pro rata basis to be determined by NSI) as constitutes 11 % of the share capital of PENAO for \$5,500,000 (Call Option). The Call Option may be exercised by written notice to NSI and the creator shareholders at any time during the period:

- commencing on the PENAO drug achieving 50% enrolment in a Phase II trial; and
- ending two months after such trial has been completed and a study completion report has been provided to the PENAO company

Note 32. Contingencies (continued)

Milestone payments

Beroni has so far paid \$2.35 million to NSI for this investment and will pay a further \$7.5 million over the next 17 months. An variation agreement was signed with NSI in December 2023 that has an expected first payment in March 2024 which was subsequently varied several times - in July 2024, in December 2024 and again in September 2025 - with the remaining payments rescheduled and repayable over the next 17 months. In the event Beroni is not able to pay the additional \$7.5 million, then PENAO Pty Ltd must issue on the same terms to NSI the shares which were to be issued to Beroni and Beroni will grant NSI an option to purchase all of the shares then held by Beroni for the lesser of the following and at NSI's sole discretion:

- the price per share paid by a genuine third-party investor for shares in PENAO Pty Ltd; or
- at a 20% discount on the price paid by Beroni for the Beroni Shares

Any director appointed to the Board by Beroni will resign with immediate effect and NSI will be appointed by PENAO Pty Ltd as the lead commercialisation party.

In the September 2025 variation agreement, the licence fees were varied to include a \$500,000 licence assignment fee which is payable upon the listing of Beroni Group Limited on Nasdaq. After payment of this fee, NSI will assign the patents to PENAO Pty Ltd.

- (b) In January 2022, Beroni signed a contract to build a new Research & Development ("R&D") centre in the Zhuhai National High-Tech Industrial Development Zone in China. Beroni plans to build a state-of-the-art facility with new preclinical research labs, manufacturing process development labs, and a GMP pilot manufacturing plant. The Company signed a renovation contract for RMB5.2 million (A\$1.13 million) with a local builder to renovate the whole R&D office. The initial renovations were completed at the end of 2022 but due to various defects and lack of certification of the equipment and facilities, the office was not able to be used until toward the end of 2023. As at 31 December 2023, the Company has paid 60% payment of RMB3.12 million to the builder, with another 20% payment of RMB1.04 million due upon rectification of defects and completion of GMP facility certification and the remaining 20% of RMB1.04 million to be settled 3 months upon completion of the whole project. The prolonged delay in the settlement of the remaining payments is due to the builder's inability to rectify the various defects to the satisfaction of the Company. The Company has subsequently terminated the services of the builder in April 2024 and is using its own resources to rectify the numerous defects. The Company estimated a total of RMB1.285 million for the rectification works. Some of the rectification works were completed in 2024 and an estimated RMB0.85 million of rectification works has yet to be completed. On 28 October 2024, the builder filed a legal claim against Beroni for the outstanding payment of RMB2.08 million and interest compensation at 10% per annum for non-payment from 30 October 2022 until the filing date of the claim. Subsequently on 6 May 2025, Beroni filed a counter legal claim against the builder for a total amount of RMB4,023,615.25 as compensation for construction delays, non-completion of contracted works, office disruptions caused by the builder's workers and additional utility expenses caused by the construction delays. The local court conducted a site appraisal of the office renovation on 4 August 2025. The outcome of the claim/counterclaim is still pending.
- (c) Beroni is required to restore the leased premises of its offices in China to their original condition at the end of the respective lease terms. In two leases, the lessee has to remove all additional renovations and not damage existing renovations while in one lease, the lessee may leave the office as it is if the lessor is willing to keep the renovations otherwise the lessee has to restore the office to its original state. It is however customary in China for the lessee to leave the office intact as the lessor may want to keep all the renovations to enhance the value of the premises. As it is not possible to meaningfully assess whether the office restoration will result in a probable outflow or to quantify or reliably estimate the liability, if any.
- (d) On 9 November 2022, the Company signed an underwriter engagement letter with the US-based underwriter Joseph Stone Capital, LLC which has the following terms and conditions:
- Raise up to USD25 million, with the final offering to be agreed between both parties
 - Share purchase warrants of 6% exercisable at 115% of the public offering price 6 months after the date of closing
 - 8% commission,
 - USD\$30,000 upfront advance for out-of-pocket expenses
 - Legal fees up to USD150,000 in the event of listing or up to USD100,000 if there is no listing
- (e) The Company has signed service agreements with its legal counsel in the US, Australia and China in respect of its application to list on the Nasdaq. Upon the successful listing on Nasdaq, the Company has agreed to pay legal fees of USD200,000, AUD2,528 and USD30,000 to these counsels respectively. The Company will also issue USD150,000 worth of shares to the US counsel.

Note 33. Events after the Balance Sheet date

There has not arisen, in the interval between the end of the financial period and the date of this report, any other item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect substantially:

- a. the Group's operations in future financial years, or
- b. the results of those operations in future financial years, or
- c. the Group's state of affairs in future financial years.

CONSOLIDATED ENTITY DISCLOSURE STATEMENT (CEDS)

Basis of Preparation

This Consolidated Entity Disclosure Statement (CEDS) has been prepared in accordance with the Corporation Act 2001 and includes required information for each entity that was part of the consolidated entity as at 31 December 2025.

Consolidated Entity

This CEDS includes only those entities consolidated as at 31 December 2025 in accordance with AASB 10 Consolidated Financial Statements.

Determination of Tax Residence

Section 295 (3A) of the Corporations Act 2001 defines tax residency as having the meaning in the Income Tax Assessment Act 1997. The determination of tax residency involves judgment as there are currently several different interpretations that could be adopted, and which could give rise to a different conclusion on residency. In determining tax residency, the consolidated entity has applied the following interpretations:

Australian tax residency

The consolidated entity has applied current legislation and judicial precedent, including having regard to the Tax Commissioner's public guidance.

Foreign tax residency

Where necessary, the consolidated entity has used independent tax advisers in foreign jurisdictions to assist in its determination of tax residency to ensure applicable foreign tax legislation has been complied with.

Partnerships and Trusts

Australian tax law does not contain specific residency tests for partnerships and trusts. Generally, these entities are taxed on a flow-through basis so there is no need for a general residence test. There are some provisions which treat trusts as residents for certain purposes, but this does not mean the trust itself is an entity that is subject to tax. Additional disclosures on the tax status of partnerships and trusts have been provided where relevant.

Boqing Zhang
Chairman and Chief Executive Officer

31 March 2026

Directors' Declaration

In the opinion of the directors of Beroni Group Limited ("the Company"):

- the attached financial statements and notes comply with the *Corporations Act 2001*, Australian Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements.
- the attached financial statements and notes give a true and fair view of the consolidated entity's financial position as at 31 December 2025 and of its performance for the financial year ended on that date;
- there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and.
- the consolidated entity disclosure statement required by section 295 (3A) of the *Corporations Act* is true and correct.

Signed in accordance with a resolution of directors made pursuant to section 303(5)(a) of the *Corporations Act 2001*.

On behalf of the directors

Boqing Zhang

Chairman and Chief Executive Officer

31 March 2026

Independent Audit Report to the Members of Beroni Group Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Beroni Group Limited (the Company) and its Controlled Entities (the Group), which comprises the consolidated statement of financial position as at 31 December 2025, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- i. Giving a true and fair view of the Group's financial position as at 31 December 2025 and of its financial performance for the year then ended; and
- ii. Complying with Australian Accounting Standards and the *Corporations Regulation 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's *APES 110 Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms given to the directors at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 2 of the financial report, which discloses that the Group's ability to continue as a going concern is impacted by continuing losses after tax. These conditions, together with other matters described in 2 of the Financial Report, indicate a material uncertainty that may cast doubt on the Group's ability to continue as a going concern and, therefore, whether it will realise its assets and discharge its liabilities in the normal course of business, and at the amounts stated in the financial report. Our opinion is not modified in respect of this matter.

Independent Audit Report to the Members of Beroni Group Limited (Cont'd)

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current year. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the Material uncertainty related to going concern section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matters	How our audit addressed the key audit matters
<p>Recoverability of Amounts Due from customers – Note 10</p> <p>As at 31 December 2025, the Group’s Statement of Financial Position includes amounts due from customers of \$131,568 after provision for expected credit losses (gross balance \$1,753,910 and provision for expected credit losses \$1,622,342).</p> <p>We focused on this area because of:</p> <ul style="list-style-type: none"> • The significance of this asset to the Group’s consolidated statement of financial position; • The value of amount due from customers comprise a significant portion of the total asset value; • The inherent uncertainty and subjectivity associated with provisions for expected credit losses due to the significant level of judgement involved in estimating future recoveries and other forward looking assumptions; • The high degree of sensitivities in the assumptions used to calculate the expected credit loss; and • The significant ageing of accounts receivable. <p>A key audit matter is trade receivables are not recoverable and they are not disclosed appropriately in the financials.</p>	<p>Our audit procedures included, amongst others:</p> <ul style="list-style-type: none"> • We assessed whether management’s expected credit loss methodology was appropriate. • We examined historical recoveries of trade receivables and their aging structure to determine whether management’s lifetime expected credit loss matrix appeared reasonable. • We reviewed and assessed other supporting documentation provided by management to substantiate the recoverability of receivables. • We reviewed subsequent credit notes issued (if any) to check for reversal of revenue/receivable. • For each accounts receivable, we checked the movement of the balance as compared to the prior year. Provision for ECL was made based on the history of collections and sales. • We assessed the reasonability and completeness of the Group’s disclosures in the consolidated financial statements.

Independent Audit Report to the Members of Beroni Group Limited (Cont'd)

Key audit matters	How our audit addressed the key audit matters
<p>Going Concern Refer to note 2</p> <p>We identified going concern as a key audit matter due to the significant level of judgement required in evaluating the Group's assessment of going concern and the events or conditions that may cast significant doubt on their ability to continue as a going concern as disclosed in Note 2.</p> <p>The Directors have determined that the going concern basis of accounting is appropriate in preparing the financial report based on cash flow projections which included a number of assumptions and high level of judgements. The directors are of the opinion that the range of possible outcomes considered in arriving at this judgement does not give rise to a material uncertainty casting significant doubt on the Group's ability to continue as a going concern. The levels of uncertainty was critically scrutinised, as it related to the Group's ability to continue as a going concern, within the assumptions and judgements, concentrating on:</p> <ul style="list-style-type: none"> • capital raising in April 2026 of AUD 7,150,000; • The consolidated entity's projected cash flow analysis supporting its ability to meet its financial obligations, whereby Board will control expenditure according to level of cash inflows; • Additional funding that may be raised through various transactions including future fundraising from financial institutions and the market; and • Issuing equity to settle future liabilities, if appropriate. 	<p>Our audit procedures included, amongst others:</p> <ul style="list-style-type: none"> • We critically analysed The Group's forecasts for the next 12 months from the date of signing the financial statements by assessing key cash inflows and outflows; • We reviewed the financial position and assessed a number of key ratios; • Reviewed Stock Subscription Agreement signed post year end for USD 7,221,051 with a investors including performance of that agreement and ability of investor to fund the subscription of shares; • Reviewed FY 2026 YTD cash inflows and outflow results against forecast; and • Reviewed subsequent bank statements upto date of signing to validate assumptions made in forecast.

Independent Audit Report to the Members of Beroni Group Limited (Cont'd)

Key audit matters	How our audit addressed the key audit matters
<p>Impairment of Intangible Assets – Note 13 As disclosed in Note 13, Intangible assets of \$5,327,830 relating to the Penao, BCI patent and Zika products made up the major portion of these assets. The Group assesses these assets for impairment as required under Accounting Standards.</p> <p>We focused on this area because of:</p> <ul style="list-style-type: none"> • The significance of this asset to the Group’s consolidated statement of financial position. • The inherent uncertainty associated with impairment analysis (which is a requirement for intangible assets not yet ready for use). <p>A key audit matter is that intangible assets are not correctly valued and disclosed in the financials.</p>	<p>Our audit procedures included, amongst others:</p> <ul style="list-style-type: none"> • We assessed whether indicators of impairment existed for these intangible assets. • We assessed whether any other impairment test requirements under Australian Accounting Standards were triggered for these assets. • We assessed the reasonability of management’s impairment assessment, including testing management’s estimates and performing procedures to assess the work of the management expert. • We calculated an independent auditor’s estimate and compared the value to management’s estimate. • We assessed the reasonability of management’s disclosures in respect of intangible asset accounting.

Independent Audit Report to the Members of Beroni Group Limited (Cont'd)

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 31 December 2025 but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon, with the exception of the Remuneration report and our related assurance opinion.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and the consolidated entity disclosure statement that is true and correct in accordance with the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error and the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error. In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

Independent Audit Report to the Members of Beroni Group Limited (Cont'd)

Auditor's Responsibilities for the Audit of the Financial Report (cont'd)

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial report. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Independent Audit Report to the Members of Beroni Group Limited (Cont'd)

Report on the Remuneration Report Opinion on the Remuneration Report

We have audited the Remuneration Report included in pages 10-13 of the directors' report for the year ended 31 December 2025.

In our opinion, the Remuneration Report of Beroni Group Limited, for the year ended 31 December 2025, complies with section 300A of the Corporations Act 2001.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the Corporations Act 2001. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
