

COMPANY ANNOUNCEMENT

Market Update

30 September 2026

The board of AdvanceTC Limited (**Company**) wishes to provide the following market updates.

Possible acquisition of new business

The Company has commenced exclusive discussions with Shifen Icelandic Springs Health Beverages Limited (**Vendor**) for the Company to acquire the Vendor's operating business. This exclusive period is for a period of two weeks expiring 15 October 2026.

The Vendor is currently listed on the Main Board of the MERJ Exchange, a licensed and regulated securities exchange in Seychelles. The Vendor's principal business, carried out by its operating subsidiaries, is the sales and marketing of packaged drinking natural mineral water in Mainland China. Currently, it has one product line, namely, packaged drinking natural DDW¹. It currently owns its own packaging operations.

Lodgement of outstanding financial statements

The Company will be calling for service proposals from suitable audit firms relating to work required to bring the Company's financial reporting current.

Updates to follow

The Company will make timely disclosures on the progress of the discussions with the Vendor, and on the progress of bringing the Company's financial reporting current.

This announcement is released on behalf of AdvanceTC Limited by:

¹ DDW refers to Deuterium depleted water. Deuterium is a stable isotope of hydrogen, also known as "heavy hydrogen". It contains one proton and one neutron in its nucleus, unlike regular hydrogen (protonium) which only has one proton. It occurs naturally in small amounts, primarily in water, and is used in various scientific and industrial applications.
