NSX Market Announcements

Business Update

The Air Change International Ltd Group ('AC1') continues to trade profitably having a strong forward order book equal to approximately 6 months manufacturing capacity with solid outstanding quotation volumes and product enquiries.

In respect to the previously announced (*22 Sept 2025 – 'Receipt of non-binding indicative offer for Business Operations & Due Diligence Period'*) possible sale of the Air Change HVAC business operations, we can advise that the essential terms of a Share Sale and Purchase Agreement have been agreed with only minor details still to be finalised

It is hoped that a final contract can be concluded in the near future at which time shareholder approval will be sought for this transaction.

End
