Telezon's Unique & Valuable Patent Portfolio Continues to Grow

HIGHLIGHTS:

- **China Patent Office issues decision to grant "Moulding Cannulae & Small Deep Holes" Patent**
- **Australia Patent Office issues decision to grant "Locking Syringe System" Patent**

The Board of Telezon Limited would like to report that the following patent offices have issued decisions to grant the following patents:

Country	Patent	Grant No.	Expiry
China	Moulding Cannulae and Small Deep Holes	200980152063.6	2029
Australia	Locking Syringe System**	2013221921	2030

Corresponding applications are under examination in several other regions.

**During the review process by the relevant international authorities of Telezon/SSB's 'Locking Syringe System' patent, several additional inventive concepts were identified within this one patent. This finding means that the Company has the ability to consider at least four more inventions for patent. If pursued, these additional concepts will further extend our already valuable IP portfolio to over 35 patents (covering both product aspects and technology).

The patents outlined in the table above extend Telezon/SSB's IP to cover additional aspects of its CoreIT[®] moulding technology and 'locking' mechanism built-in to its syringe system product.

For and on behalf of Telezon Limited,

Dr Michelle Carr

Director & Co. Secretary

T: 61 03 9763 8605 F: 61 03 9763 2714
