RE: Application for Quotation of Additional Securities

Dear Scott,

Herewith completed application form to include the placement of 10,000 shares, the placement of 10,000 options, the two for one bonus issue and the placement of a further 300,000 shares and 300,000 December 2007 options, subsequent to the bonus issue. Please note that I have included the December '07 options under paragraph 9 as they are not yet in a class of securities quoted on the NSX. Could you please advise as to the form of further application required to get those 17,175,000 December 2007 options listed.

Thank you for bringing rule 6.52 of section 2A of the listing rules to our attention. We will certainly abide by that rule prior to any further issue of shares or options.

A further application for quotation of additional securities will follow in relation to the 15,000,000 shares to be issued pursuant to the ENSI-Med transaction.

Regards,

Bronte Douglass
