2. INFORMATION ON THE COMPANY

2.1 Overview of Business

Illuminator Investment Company Limited has been formed to invest in a portfolio of investments (see Section 2.7 for details of Permitted Investments).

Whilst it is anticipated that the Company will predominantly invest in listed Australian securities and managed funds, it may also invest in unlisted and overseas securities and managed funds.

In making its investment decisions the Company will generally take a medium to long term view with respect to its investments.

The Company intends to manage its Portfolio with a view to building the number of issuers represented in the Portfolio to a minimum of 20 and a maximum of 40.

The Company intends to focus on active capital management which may involve the issue of securities through bonus issues, rights issues and option issues, with a view to enhancing the value of the securities held by the investor.

The Company will also maintain a Dividend Reinvestment Plan (see Section 9.7 for details).

2.2 Investment Objectives

The three investment objectives of the Company are to:

- preserve the capital of the Company;
- achieve a high real rate of return, comprising both income and capital growth; and
- deliver investors a secure income stream in the form of fully franked dividends.

2.3 Investment Philosophy

The Company will be a medium to long-term investor in companies, trusts and interest bearing securities. However the Company may from time to time acquire investments with a view to profit through short term trading opportunities.

The Company primarily seeks to invest in well-managed businesses with a profitable history and with the expectation of sound dividend or distribution growth.

The Company recognises that investment markets are not always perfectly efficient. This provides the opportunity to generate investment results. The Company believes that this can only be achieved on a consistent basis by adopting a long term investment horizon, seeking to invest in companies and securities which offer attractive yields and the potential for high or improving growth over the medium to long term.

The Company will:

- focus on the investment merits of individual stocks rather than market and economic trends; and
- be an active investor, seeking to invest in shares which it expects to yield dividends and which the Company assesses to be undervalued relative to their longer term growth prospects.

In accordance with its long-term investment philosophy, the Company does not intend to seek to increase profit for distribution to Shareholders by selling investments.

The Company intends to reflect the revaluation of its investments in the asset revaluation reserve rather than in operating profit, subject to compliance with any future changes in relevant accounting standards.

2.4 Investment Strategy

To achieve its Investment Objectives the Company (through the Manager) intends to invest predominantly in the Australian equities market, however, it will diversify its risks by investing in other asset classes and may invest in unlisted securities and managed funds and securities and managed funds quoted on overseas exchanges. The Company may also invest in any other Permitted Investments – see Section 2.7.

Whilst it is expected that the Investment Portfolio will be diversified across a number of stocks in most industry sectors, the portfolio structure will be based on the investment merits of individual companies and their securities and will not be limited or constrained to any particular exposure to industry groups. This may at times lead to a high investment exposure to any one industry sector. The Company does not intend to follow the weightings of an ASX or other index.

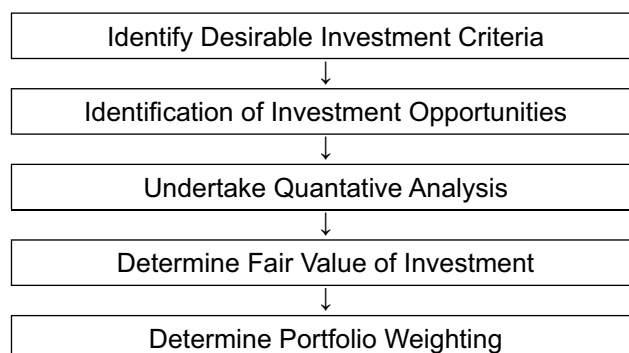

The Company may borrow on either a secured or unsecured basis to purchase additional permitted investments, or provide additional working capital for the Company. Any borrowings however will be limited to a maximum of three times shareholders equity.

The above strategy may be achieved through the purchase of shares or other Permitted Investments. See Section 2.7 Permitted Investments below for details.

2.5 Investment Process

The Company has appointed the Manager to manage and invest the Company's funds in the Portfolio.

The Manager will adopt a disciplined investment process that is illustrated by the following flow chart:

(a) Identify Desirable Investment Criteria

The Manager regards the following as desirable investment criteria:

- Attractive return on equity
- Attractive investment fundamentals such as low price to earnings and cash flow multiples that reflect undervaluation presently, not based on what may occur in the future
- Good long term growth potential
- Management has a record of performance and integrity
- Management owns a material number of shares in the entity
- Securities that are trading at prices substantially less than their intrinsic value

(b) Identification of Investment Opportunities

The Manager will undertake various activities to identify Investment Opportunities for the Company.

These activities may include but are not limited to:

- Perusal of Company Annual Reports and Announcements
- Monitoring Media Coverage
- Examination of Independent and Broker Research
- Identification of Key Industry Trends
- Review the Impact of Legislative Changes
- Meeting with Key Management of potential investees
- Discussion with industry competitors, customers and suppliers (if relevant)

(c) Undertake Quantative Analysis

The Manager will undertake a financial analysis of the proposed investees.

This will generally include a calculation of the potential investees':

- Return on Equity
- Earnings before Interest, Tax, Depreciation, and Amortisation
- Growth In Earnings Per Share
- Price Earnings Ratio
- Debt to Equity Ratio
- Net Tangible Assets
- Enterprise Value

(d) Determine Fair Value of Investment

The Manager, having regard to the above will determine what it believes is the fair value of an Investment.

The Manager seeks to purchase investments on behalf of the Company at no more than what it regards as the fair value of those investments.

(e) Determine Portfolio Weighting

The Manager, in consultation with the Company, will determine appropriate Portfolio weighting. The aim, however, is to have a diverse Portfolio that does not have heavy exposure to any one share or other financial product.

2.6 Dividend Policy

The Company intends to pay dividends from the profit, dividend and interest income as permitted by law and prudent business practices.

Dividends will be franked to the extent that available imputation credits permit.

2.7 Permitted Investments

Under the Management Agreement, the Manager is permitted to undertake investments on behalf of the Company without Board approval. However, if the proposed investment is not in accordance with written guidelines issued by the Board from time to time, Board approval for the investment is required.

The Company proposes to invest in the following investments:

- (a) Shares, stock, rights or other securities;
- (b) warrants and options to purchase any investment and warrants and options to sell any investment which is a permitted investment;

-
- (c) interest bearing deposits, bills of exchange, promissory notes or other negotiable instruments;

 - (e) any securities, bonds, notes or other interest bearing debt issued by any Government;

 - c) that is a warrant as defined in the ASX Operating Rules that has been admitted by the ASX to trading status on a financial market of the ASX."

2.9 Reports to Shareholders

To assist shareholders in the Company to assess the value of their Shares and Options, within 14 days after the end of each month the Company will release to shareholders through NSX a statement of the net tangible asset backing of its Shares as at the end of the preceding month.

4.4 Proposed Accounting Policies and Notes to Accounts

A summary of significant accounting policies which have been adopted in the preparation of the pro forma Statements of Financial Position and Cash Position set out in Section 4.1 or which will be adopted and applied in preparation of the financial statements of the Company for the year ended 30 June 2004 and subsequent years follows:

(a) Basis of preparation of accounts

The financial statements are a general purpose financial report that have been prepared in accordance with applicable Accounting Standards and other mandatory professional reporting requirements (Urgent Issues Group Consensus Views) and the Corporations Act 2001. The Statements are prepared from the

records of the Company on an accruals basis. They are based on historical costs and do not take into account changing money values or, except where specifically stated, current valuation of non-current assets.

(b) Investments

Listed shares and securities are valued at market value as quoted on the relevant financial market less an allowance for realisation costs. Non listed shares and securities are valued at their estimated market value less an allowance for realisation costs. Investments including shares and securities are valued continuously and for this reason, cost of sales equals sales revenue when investments are sold. Revaluations are credited directly to the Asset Revaluation Reserve after deducting a provision for potential deferred capital gains tax. When shares, securities and other investments are disposed of, the balance in the Asset Revaluation Reserve relating to the disposed share, security or other investment is transferred to the Capital Profits Reserve.

(c) Revenue recognition

Dividends and distributions are brought to account on the date that the shares or units are traded "ex dividend". Interest income is brought to account on an accruals basis.

4.5 Proceeds of the Issue

The proceeds of the Issue will be used for investment opportunities that meet the Company's Investment Objectives as set out in Section 2.2.

6. RISK FACTORS

6.1 General Risk Factors

The following matters, as well as others described elsewhere in this Prospectus, should be carefully considered in evaluating the Company and its prospects. No guarantee can be given in respect of the future earnings of the Company or the earnings and capital appreciation of the Company's investments.

- (a) the success and profitability of the Company in part will depend upon the ability of the Directors and the Manager to invest in well-managed companies which have the ability to increase in value over time;
- (b) the future earnings of the Company and the value of the investments of the Company (operating results) may be materially affected by the general economic climate and other factors beyond the control of the Company including, but not limited to, variations in:
 - i. legislation and government policies;
 - ii. the taxation laws of Australia;
 - iii. exchange rates
(i.e. currency movements);
 - iv. short and long term interest rates; and
 - v. commodity prices.
- (c) the past performance of funds managed by the persons associated with the Manager are not necessarily a guide to future performance of the Company;
- (d) the selling or purchasing of an unhedged option or warrant runs the risk of losing the entire investment or of causing significant losses to the Company in a relatively short period of time;
- (e) the Company relies on a number of key personnel, in particular Steven Pritchard, and has service contracts with them in order to retain them. The loss of any key employees, and in particular Steven Pritchard, may have a detrimental effect on the Company;
- (f) the Performance Fee may create an incentive for the Manager to make investments on behalf of the Company that are riskier or more speculative than would be the case in the absence of a fee based on the performance of the Company;
- (g) the Portfolio is less diversified than other listed investment companies;
- (h) the price at which Shares are traded on NSX may be below the net asset backing of those Shares. The Constitution of the Company does not entitle Shareholders to require the Board to implement a share buy-back or any other capital reconstruction or to take any other remedial action;
- (i) operational costs for the Company as a proportion of total assets will be affected by the level of total assets of the Company and by the level of acceptance of this Offer. Operational costs will represent a greater proportion of total assets and will reduce the operating results of the Company and accordingly the ability to make dividend payments, if the Company only achieves the minimum subscription under this Offer than if it secures a greater level of acceptance;
- (j) the size of the Portfolio will affect the risk profile of the Portfolio. The Company may not be able to diversify its investments and so manage its risks as efficiently if it only achieves the

Minimum Subscription under this Offer than if it secures a greater level of acceptance. However, the risk of loss of investments included in the Portfolio will not necessarily be reduced if the level of acceptance under this Offer exceeds the Minimum Subscription. Effective risk management depends on a range of factors including diversification of investments and other factors;

- (k) the ability of the Manager to continue to manage the Portfolio in accordance with this Prospectus and the Corporations Act is dependent on the maintenance of the Manager's Australian Financial Service ("AFS") licence and its continued solvency. Maintenance of the AFS licence depends, among other things, on the Manager continuing to comply with the ASIC imposed licence conditions and the Corporations Act;
- (l) the Manager has the ability to transfer the Management Agreement to another Manager as it sees fit which may change the personnel responsible for managing the Portfolio of the Company; and
- (m) while borrowing to invest has the potential to increase the returns on investments, it is important for investors to recognise that the borrowing or gearing of an investment portfolio can also multiply the effects of falls in the value of investments, for example, if the Company borrowed a sum equivalent to three times its shareholders equity, and the value of the investment portfolio as a whole fell by 25%, then shareholders equity would be reduced to nil.

- (n) investors are strongly advised to regard any investment in the Company as a long term proposition and to be aware that as with any equity investment substantial fluctuations in the value of their investment may occur.

This list is not exhaustive and potential investors should read this Prospectus in full and, if they require further information on material risks, seek professional advice.

6.2 Investor Considerations

Before deciding to subscribe for Shares and Options, Applicants should consider whether Shares and Options are a suitable investment. There are general risks associated with any investment in the stock market. The value of Shares listed on the NSX may rise or fall depending on a range of factors beyond the control of the Company.

There may be tax implications arising from the Application for Shares and Options, the receipt of dividends (both franked and unfranked) from the Company, participation in the dividend re-investment plan of the Company, participation in any on market share buy-back and on the disposal of Shares or Options. Applicants should carefully consider these tax implications and obtain advice from an accountant or other professional tax adviser in relation to the application of tax legislation. If you are in doubt as to whether you should subscribe for Shares and Options, you should seek advice on the matters contained in this Prospectus from a stockbroker, solicitor, accountant or other professional adviser immediately.

TAXATION REPORT

We have been requested to provide a report on the income tax issues affecting Illuminator Investment Company Limited (the "Company") and its shareholders, for inclusion in a Prospectus to be dated on or about 5 March, 2004. This report should be read in conjunction with the Prospectus issued.

Our advice is based on the relevant taxation laws as presently incorporated in the *Income Tax Assessment Act 1936*, *Income Tax Assessment Act 1997* and *Income Tax Rates Act 1986* (all of which are referred to collectively herein as "the Act").

Our advice is provided on the basis that the Company will be a listed investment company ("LIC") in accordance with Subdivision 115-D of the Act at the time the shares are issued under the Prospectus and that the Company will adhere to the requirements detailed in the Act in order to continue as a LIC.

This report is intended to only provide a general overview of the income tax consequences to investors. It is not intended to be a detailed analysis of all such issues. Individual investors should consult their own taxation advisor about their specific taxation circumstances.

Shareholders in a public company are generally taxed on the dividends received and are subject to the Income Tax upon the disposal of their shares in the company.

Dividends

Dividends received by an Australian resident shareholder (either directly or indirectly through a partnership or trust) is included in the taxable income of the shareholder.

To the extent that dividends are franked, then the imputation credits attached to the franked dividend are also included in the taxable income of the shareholder. Shareholders are then entitled to a tax credit equivalent to the imputation credit received.

Dividends received by a non-resident shareholder will be subject to 15% withholding tax, to the extent the dividend received are unfranked. No withholding tax is paid on franked dividends. Where shareholders receive franked dividends from the Company, the shares in the Company need to be held 'at risk' (as defined) for a period of 45 days before being entitled to franking benefits.

This report is prepared for the purpose of providing information to investors in connection with the proposed issue of shares in the Company. It is not intended to constitute an offer of securities or any other financial product. It is not intended to be a substitute for professional advice. It is not intended to be relied upon for any purpose other than that for which it is prepared. It is not intended to be used for any other purpose.

Listed Investment Company Capital Gains

Under s115-D of the Tax Act, a LIC may make an “LIC Capital Gain” where it sells a post-1985 asset after 1st July 2001, where that asset has been held for more than 12 months. We have assumed that the company will meet the definition of a LIC.

In accordance with current tax law, this gain will be taxable to the LIC at 30%.

Assuming the LIC transfers the LIC Capital Gain profit (after tax) to a Discount Capital Gains Reserve, a dividend paid from this reserve would attract concessional tax treatment in the hands of the shareholder.

The dividend paid would be frankable and subject to the regular franking rules. Certain shareholders are entitled to a tax deduction in respect to the “attributable part” of the dividend.

The tax deduction amounts to 50% (for individual shareholders) or 33 1/3% (for superannuation fund shareholders) of the attributable part of the dividend.

The “attributable part of the dividend” is calculated by a formula but is equal to the dividend amount plus the tax paid at the company level. In practice this is equal to the grossed up value of the dividend ($100/70 \times \text{dividend amount}$).

In this way the effect on a dividend received would be calculated as follows:

Dividend received by an individual	
Dividend Paid	70.00
Add: Imputation Credits	30.00
Less: Tax Deduction Allowable under Subdivision 115-D (ie 50% of \$100 total taxable dividend)	(50.00)
Net Taxable Income	50.00
Income Tax @ 48.5% (maximum individual rate)	24.25
Less: Imputation Credits	(30.00)
Tax Refund	5.75
Summary	
Dividend Received	70.00
Tax refund	5.75
Value of Dividend After Tax	75.75
Effective tax rate on an LIC capital gain	24.25%
Dividend received by a superannuation fund	
Dividend Paid	70.00
Add: Imputation Credits	30.00
Less: Tax Deduction Allowable	(33.33)
Net Taxable Income	66.67
Income Tax @ 15% (maximum rate)	10.00
Less: Imputation Credit	(30.00)
Tax Refund	20.00
Summary	
Dividend Received	70.00
Tax Refund	20.00
Value of Dividend After Tax	90.00
Effective tax rate on an LIC capital gain	10.00%

For corporate shareholders, the receipt of a franked dividend paid from a discount capital gains reserve will be treated in the same way as any other dividend. That is, the franking credit will be added to the company's franking account, while the dividend will be 100% rebateable and no further tax will be paid at the company level.

Corporate shareholders can not pass on the discount capital gain to their own shareholders.

Gains from Disposal of Shares

Where shares in the Company are acquired on revenue account by a shareholder, any gain or loss on sale is taxable as ordinary income.

Where shares in the Company are acquired on capital account by a shareholder, any gain or loss on sale is taxed in accordance with the Capital Gains Tax ("CGT") rules. Where shares in the Company are held for more than 12 months, a CGT discount of 50% would be available to individual shareholders (33 1/3% for superannuation funds).

Any CGT loss incurred is quarantined and only able to be offset against capital gains derived.

Gains on Disposal of Options

Any gain on sale of options will either give rise to a capital gain (if held on a capital account) or a profit if held as trading stock.

There will be no cost base of options issued under this Prospectus as they are being issued for no consideration. There would therefore be no Capital Gains Tax loss on the sale of the options issued pursuant to the Prospectus.

Any options acquired after the initial issue will have a cost base equivalent to the acquisition price.

On exercise of the option, a shareholder will be required to pay \$0.50 to the Company in return for the issue of one share. There are no tax consequences to the Company for the issue of the share.

The shareholder who exercises an option will acquire a share in the Company. The taxation consequences from the disposal of the share are as outlined above.

In the event that an investor holds their shares or options in the Company as a revenue asset such as trading stock, any resulting gain from the sale of the shares or options would be subject to tax as ordinary income at their applicable rate of tax. As such, the CGT Discount provisions would not apply.

Yours faithfully,

REES PRITCHARD PTY. LIMITED

MARGARET J GLENN
ASSOCIATE DIRECTOR

Powers of Manager

The Manager has, subject to any written guidelines issued by the Company from time to time, the full powers of a natural person for carrying out its responsibilities and obligations under this Agreement including but not limited to the delegating of any or all of its rights, powers and duties under this Agreement to another party, whether related or not. The Manager must exercise its powers in accordance with and subject to the provisions of this Agreement.

Monthly Valuations

The Manager must arrange for a calculation of the fair

market value of the Portfolio at least monthly or as otherwise agreed with the Company and provide such calculations to the Company as soon as practicable after such calculations are made. All costs incurred by the Manager in arranging this calculation are to be paid by the Company.

Management Fee

In return for the performance of its duties as Manager of the Company’s Portfolio, the Manager is entitled to be paid the following amounts:

- (a) a monthly Management Fee, within 7 days of the end of the month equal to 1% of the value of the Portfolio calculated on the last business day of the month divided by 12;
- (b) for the provision of the services by an employee of the Manager or a related body corporate as managing director or chief executive officer of the Company at a rate of \$3,500 plus applicable goods and services tax per month or such higher rate as the Manager and the Company may agree from time to time payable monthly in arrears. If the Manager proposes an increase in the rate which is rejected by the Company, the Manager may procure the services of an individual to act as a managing director or chief executive officer of the Company who is not an employee of the Manager or a related body corporate and will be entitled to be reimbursed by the Company for all expenses reasonably and properly incurred by the Manager in connection with procuring those services;

- (d) for the provision of secretarial or accounting services which the Manager provides from its own resources or the resources of a related body corporate, a reasonable arm’s length rate.

The Manager does not intend to seek reimbursement of the salary of the managing director or chief executive

officer until the earlier of two years from the date of this Prospectus or the net assets of the Company exceed \$5,000,000.

Performance Fee

The Manager will be entitled to be paid and the Company must pay to the Manager a fee ("Performance Fee") in respect of each Performance Calculation Period, subject to clauses (a) and (b), of 20% of BA where BA is calculated in accordance with the following formula:

$$BA = (FV - IV) - (IV \times BM)$$

Where

BA is the base amount to be used in calculating the Performance Fee outlined above;

FV is the Value of the Portfolio calculated on the last Business Day of a Performance Calculation Period

IV is the Value of the Portfolio calculated on the last Business Day of the preceding Performance Calculation Period

BM is the rate of return for the UBS Warburg Australian Bank Bill Index for the Calculation Period.

- (a) If the Value of the Portfolio calculated on the last Business Day of a Performance Calculation Period is less than the Value of the Portfolio calculated on the last Business Day of the preceding Performance Calculation Period, no Performance Fee is payable in respect of that Performance Calculation Period.
- (b) If the rate of return for the UBS Warburg Australian Bank Bill Index for the Calculation Period is negative for the Performance Calculation Period, then the base amount (BA) will be calculated as $FV - IV$.

Where UBS ceases to publish the UBS Warburg Australian Bank Bill Index, then the published index, which most closely resembles it, must be used for the purposes of the calculation.

In calculation of the Performance Fee for a Performance Calculation Period, changes in the value of the Portfolio as a result of the issue of Securities by the Company, capital reductions by the Company, share buy-backs by the Company and dividend distributions by the Company will be disregarded or adjusted for that Performance Calculation Period in a manner determined by the Auditor of the Company at the conclusion of the Performance Calculation Period.

The Auditor has the power to determine the correct calculation of the Performance Fee.

The Performance Fee is payable within 28 days of the end of the Performance Calculation Period

The Manager may, within 14 days of the receipt of the Performance Fee, subscribe for shares in the Company to a value not exceeding the value of the Performance

Fee received. Such shares shall be allotted at the weighted average market price of the Shares sold on the NSX on the first three days of the new calculation period. If no trading occurs during that period, the shares shall be allotted at the price that the directors deem fair and reasonable in the circumstances.

The Company must indemnify the Manager against any Goods and Services Tax payable in respect of any Management Fee or Performance Fee due to the Manager.

The Company shall be responsible for:
